Student Self-Evaluation: Fostering

Reflective Learning Jean MacGregor, 1993 For several decades college teachers have been asking students to engage in self evaluation to reflect on their academic work and describe and evaluate it in writing Student self evaluation is both a process consisting of acts of reflecting composing and writing and a product a written document Student self evaluation does not obviate the need for student exams and papers crucial indicators of student mastery of material or complexity of thinking Rather student self evaluation supplements and complements that information by asking students to describe in their own words their learning and its value to them This writing and the conversations that faculty members and students have about it can be instructional illuminating and at times transformative Student self evaluation is primarily a learning strategy but it is also a promising assessment approach while enriching learning for students it also can help teachers and

Assessment, Learning and Judgement in Higher Education Gordon Joughin, 2008-12-11 There has been a remarkable growth of interest in the assessment of student learning and its relation to the process of learning in higher education over the past ten years This interest has been expressed in various ways through

large scale research projects international conferences the development of principles of assessment that supports learning a growing awareness of the role of feedback as an integral part of the learning process and the publication of exemplary assessment practices At the same time more limited attention has been given to the underlying nature of assessment to the concerns that arise when assessment is construed as a measurement process and to the role of judgement in evaluating the quality of students work It is now timely to take stock of some of the critical concepts that underpin our understanding of the multifarious relationships between assessment and learning and to explicate the nature of assessment as judgement Despite the recent growth in interest noted above assessment in higher education remains under conceptualized This book seeks to make a significant contribution to conceptualizing key aspects of assessment learning and judgement **The NPEC**
