Sport Coach Education, Development, and Assessment Liam McCarthy, 2024-08-19 Sport Coach Education

Development and Assessment offers a range of coach assessment ideas and practices from leaders in the coach education and development field. A combination of theory and practice focused chapters aims to stimulate thoughts, dialogue, and actions. Sport coaches play an increasingly important role in delivering positive outcomes through sport for individuals, groups, and societies at large. It is understandable therefore that attention is increasingly being directed towards how coaches are supported in their roles. Perhaps the most dominant support mechanism is large scale coach education programmes. These professional development opportunities invite coaches to participate in a learning experience which typically involves exposure to new ideas, opportunities to practice, and an assessment. Much has been said and written about the extent to which these programmes are effective and the degree to which they contribute to coach learning or not. These discussions typically reference the learning environment, nature of the curriculum, and report coaches' experiences. However, lacking in these discussions is any deliberation over coach assessment as a consistent feature of nearly all of these programmes. The world over, this book reflects a very deliberate attempt to platform and promote the issue of coach assessment. This book is designed to offer support and guidance to sport coaches who are engaged in assessment, coach educators, developers who are delivering assessment activities, and programme designers, policy architects who are creating learning opportunities for coaches.
