

Laboratory Activity #1 — Student Laboratory Packet

Relationships and Biodiversity*A Laboratory Activity for the Living Environment***Introduction**

Botana curus is a valuable plant because it produces Curol, a compound used for treating certain kinds of cancer. Curol cannot be produced in the laboratory. *Botana curus* grows very slowly and is on the endangered species list, so its ability to provide Curol in large quantities is limited.

Species that are more closely related to *Botana curus* are more likely to produce the important substance Curol. Three similar plant species that are plentiful (X, Y, and Z) may be related to *Botana curus*. You will work as a researcher to:

- gather structural and molecular evidence to determine which plant species is most closely related to the hypothetical species, *Botana curus*
- use this evidence to decide which plant species is most likely to serve as a source of the important substance Curol

Safety

- You will need to wear goggles while conducting Tests 4 and 5.
- Do not eat or drink anything in the laboratory while doing this laboratory activity.

Important Note: Record all of your data and answers on these laboratory sheets. You will need to keep them for review before the Regents Examination. Later, you will need to transfer your answers to a separate Student Answer Packet. Your teacher will use the packet in grading your work, and the school will retain it as evidence of your completion of the laboratory requirement for the Living Environment Regents Examination.

Structural Evidence for Relationships

Perform the following tests and record your observations in Table 1 on page 8 of this packet. Use a hand lens or microscope as needed.

Test 1-Structural Characteristics of Plants

- Do not remove the plant samples from the plastic bags/cards.
- Compare the structural characteristics of the plant samples. Record your observations in Table 1 (see page 8).

Test 2-Structural Characteristics of Seeds

- Do not remove the seed samples from the plastic bags/cards.
- Compare the structural characteristics of the seed samples. Record your observations in Table 1.

"Relationships and Biodiversity" is a laboratory activity produced by the State Education Department for use in fulfilling part of the laboratory requirement for the Regents Examination in Living Environment. Reproducing any part of this laboratory activity by other than New York State school personnel is illegal.

Relationship And Biodiversity Lab Answer:

Nature's Tapestry: Uncovering the Beauty and Importance of Biodiversity Juan Armando Sánchez, 2023-10-09 We cannot separate human beings from biodiversity Our vital functions and our health are synergistic with other species The number of microorganisms we live with is greater than the total number of cells in our bodies So separation from biodiversity and its loss are the greatest threats to human survival and the current model for human development affects our very lives We must integrate marine and terrestrial life to understand our interdependence with biodiversity Colombia a megadiverse country with access to two oceans is the perfect canvas on which to illustrate this message nature has sustainable and straightforward solutions to society's emerging problems The new challenges of a changing environment raise increasingly relevant questions that we must address to prosper as individuals and as a society Can we prevent a new pandemic of viral origin How will we feed a constantly growing population How will the extinction of biological species affect us Do we function the same as all other living beings Are our bodies entire ecosystems for other species Is there a better model for economic development This book presents an approach to these discussions based on Colombia's biodiversity to uncover biodiversity's beauty and importance our nature's tapestry What we have here is an opportunity that we cannot miss **The Handy Biology Answer Book** Patricia Barnes-Svarney, Thomas E. Svarney, 2014-07-21 Easy to use and friendly guide explains the inner workings of cells bacteria viruses fungi plants animals as well as evolution the environment DNA and chromosomes genetics and genetic engineering laboratory techniques and much much more Gene therapy Forensic DNA profiling Biochemistry Biotechnology Cloning Stem Cells Super Bugs Genetically modified food Botany Zoology Sex The study of life and living organisms is ancient broad and ongoing Biology combines the Greek word for life bios with the suffix ology or science study knowledge of The new completely revised and updated The Handy Biology Answer Book examines explains and traces mankind's understanding of this important topic From the newsworthy to the practical and from the medical to the historical this entertaining and informative book brings the complexity of life into focus through the well researched answers to more than 1 250 common biology questions such as What is life Why do you need protein in your diet Do animals suffer from allergies just like humans What is the Human Genome Project Why do birds fly in formation Can the environment affect genes Do bacteria get addicted to caffeine What was the historical significance of hemp How are seedless grapes grown What is social Darwinism Can animals suffer from psychological disorders The Handy Biology Answer Book has clear concise answers to questions on everything from genetics to the anatomy of cells to the emotional life of elephants and from the environment and ecology to human biology and evolution It's a must have for any student of life With many photos illustrations and other graphics this tome is richly illustrated Its helpful bibliography and extensive index add to its usefulness **The Blue Compendium** Jane Lubchenco, Peter M. Haugan, 2023-05-24 Home to over 80 percent of all life on Earth the ocean is the world's largest carbon sink and a key source of food and economic security for billions of people The

relevance of the ocean for humanity's future is undisputed. However, the ocean's great potential to drive economic growth and equitable job creation, sustain healthy ecosystems, and mitigate climate change is not yet fully recognised. Lack of awareness of this potential, as well as management and governance challenges, pose impediments. Until these impediments are removed, ocean ecosystems will continue to be degraded, and opportunities for people lost. A transition and a clear path to a thriving and vibrant relationship between humans and the ocean are urgently needed. This open access collection of papers and reports identifies a path that is inspired by science, energised by engaged people, and emboldened by visionary leaders. These assessments of knowledge are commissioned by the High Level Panel for a Sustainable Ocean Economy (Ocean Panel), which was established in September 2018 as a unique initiative led by heads of state and government from around the world to showcase the latest leading edge science knowledge and state of the art thinking on key ocean issues. Altogether, *The Blue Compendium* offers innovative ocean solutions in technology, policy, governance, and finance realms that could help accelerate a transition to a more sustainable and prosperous relationship with the ocean. The comprehensive assessments have already informed policy making at the highest levels of government and motivated an impressive array of responsive and ambitious action across a growing network of leaders in business, finance, and civil society.

Origin and Evolution of Biodiversity Pierre Pontarotti, 2018-08-27. The book includes 19 selected contributions presented at the 21st Evolutionary Biology Meeting, which took place in Marseille in September 2017. The chapters are grouped into the following five categories: Genome, Phenotype, Evolution, Self, and Nonself. Evolution, Origin of Biodiversity, Origin of Life, Concepts. The annual Evolutionary Biology Meetings in Marseille serve to gather leading evolutionary biologists and other scientists using evolutionary biology concepts, e.g. for medical research. The aim of these meetings is to promote the exchange of ideas, to encourage interdisciplinary collaborations. Offering an up-to-date overview of recent findings in the field of evolutionary biology, this book is an invaluable source of information for scientists, teachers, and advanced students.

Encyclopedia of Ecology Brian D. Fath, 2018-08-23. *Encyclopedia of Ecology*, Second Edition, Four Volume Set, continues the acclaimed work of the previous edition published in 2008. It covers all scales of biological organization, from organisms to populations to communities and ecosystems. Laboratory, field, simulation, modelling, and theoretical approaches are presented to show how living systems sustain structure and function in space and time. New areas of focus include micro and macro scales, molecular and genetic ecology, and global ecology, e.g. climate change, earth transformations, ecosystem services, and the food-water-energy nexus are included. In addition, new international experts in ecology contribute on a variety of topics. Offers the most broad-ranging and comprehensive resource available in the field of ecology. Provides foundational content and suggests further reading. Incorporates the expertise of over 500 outstanding investigators in the field of ecology, including top young scientists with both research and teaching experience. Includes multimedia resources such as an Interactive Map Viewer and links to a CSDMS Community Surface Dynamics Modeling System, an open source platform for modelers to share and link models.
