LP Gas Engine Tractors

SAFETY RELIEF VALVE

The relief valve is a safety device to protect the tank from excessive vapor pressure due to excessive heat. It allows vapor in the tank to escape should the pressure in the tank rise above 312 pounds per square inch. It will reseal itself automatically, when the tank pressure returns to normal.

VAPOR RETURN VALVE

The vapor return valve is used to connect the vapor space in the tractor tank with the vapor space in the storage tank. This equalizes the pressure in the two tanks, permitting transfer of fuel by gravity or reducing the

pump pressure required to transfer fuel. A built-in excess flow valve closes if the flow through the valve becomes excessive. A screw cap (with attached chain) is also provided to exclude dirt.

VAPOR AND LIQUID SERVICE VALVES

Internal tank piping delivers vapor from the top of the tank to the vapor service valve. Liquid from the bottom of the tank is delivered to the liquid service valve. External fuel lines connect both valves to the inlet port of the fuel filter. Both service valves have excess flow valves which close if the flow through them becomes excessive.

Farmall and International 806 Tractors, 1967*

The Complete Book of Farmall Tractors Robert N.

Pripps, 2020-06-23 The Complete Book of Farmall Tractors details the complete evolution of the popular marque's iconic models. The engaging text includes series evolution, historical context, and technical details accompanied by beautiful contemporary and historic images. In 1923 International Harvester revolutionized the tractor world by conceiving the Farmall brand, a revolutionary new line of all-purpose tractors designed for small to medium-sized farms. Eventually offering an array of engine and equipment options by the 1930s, Farmalls were bestowed with letters as their model names, from the compact A, B, and C models to the larger H and M tractors. Fittingly known as the Letter Series, the tractors were even given a streamlined design by famed industrial designer Raymond Loewy. Not surprisingly, they went on to become some of the most widely produced and best-selling American farm tractors of all time, to be followed beginning in 1954 with the numbered Hundred Series models. By 1947, Farmall had built over 1 million tractors. Amazingly, many are still in use today, not just as collector vehicles but often as working farm tractors. In *The Complete Book of Farmall Tractors*, tractor historian Robert Pripps explores the entire range of Farmall tractors from their inception to their final model year in 1973. Pripps includes all models, from Diesel and LPG versions to orchard tractors. Pripps also explains the evolution of Farmall lines and gives coverage to the entry market Cub, unveiled in 1947, as well as the Hundred Series right up to the cancellation of the Farmall name in 1973. Through engaging text and fascinating photography, *The Complete Book of Farmall Tractors* preserves the story of the legendary pioneering machines in detail. The book's content is organized chronologically, and its detailed text shines a light on Farmall's long history and evolution. Beautiful images, both modern and historic, bring the story to life, and thorough spec tables highlight key technical and performance specifications. The result is the ultimate reference to some of the most popular farm tractors in history. *International Harvester Tractors, 1955-1985* Kenneth Updike, Ken Updike, 2000

Histories and detailed data cover model evolution, mechanical changes, serial number information, paint, and accessory codes, and more. **Classic Farmall Tractors** Kenneth Updike, 2008 From the first tractor built in 1924 to the last Farmall model to roll off the line, this richly illustrated history tells the full story of Farmall tractors and fills in a key chapter of American agricultural history.
