ORACLE STUDENT SYSTEM — STUDENT FINANCE 11*i*

The Oracle Student Solutions allows versatile definition and maintenance of discrete student tuition and fee charges and payments, and provides a set of tools to establish the rules controlling their application.

Oracle Student Solutions enables you to establish multiple tuition rates based on student type, program, and residency and also based on non-credit and continuing education fees and user-defined fee types and tiers. The ability to make a fee assessment of students prior to registration is also available.

Tuitions and fees may be structured by teaching period, units, unit workload, credit points, locations, or combinations of these. Examples of third-party charges could be fees for housing or dining, or charges which are optional, such as incremental fees that student systems charges. Thus, all student charges are accommodated by the system.

Billing is supported by the ability to select a population for billing and extract the necessary billing information to support the generation of student bills. Students may view their outstanding balance through self-service forms, as well as pay tuition and fees, and other charges on-line using iPayment.

Automatic assessment and application of finance charges and late fees can be accomplished. Charges are assessed using flat rate or periodic rates based upon average daily balance, actual balance, or calculated balance outstanding for a fee period, month, accrual period, or academic year. In addition, this feature will support the need to waive a finance charge or a late fee at the individual student account level, at the fee type level, and at an individual transaction level.

Sponsorship programs are managed in the system with the ability to record the sponsorship award, apply funds to the student accounts, and extract the billing information needed to support billing the sponsor on behalf of the student.

The institution may allow the automatic dropping of enrollment units based on non-payment by setting up a process which will withhold payments made against enrollment units and drop units that have not been paid by the end of the day.

Other key features include automated account credit/debit updates and
