

Combining Transformations

Section A

Complete the transformations by drawing the shapes on the coordinate grids.

- 1) Shape A is first reflected in the y -axis and then translated by the vector $\begin{pmatrix} -2 \\ 6 \end{pmatrix}$ to give Shape B.

- 2) Triangle C is rotated 180° from the point $(-1, 2)$ and is then reflected in the line $y = x$ to give Triangle D.

- 3) Shape E is first enlarged by a scale factor of -2 from the centre of enlargement $(2, -3)$ and secondly translated by the vector $\begin{pmatrix} -4 \\ 3 \end{pmatrix}$ to give Shape F.

- 4) Shape G is rotated 90° clockwise about the origin and is then reflected in the line $x = -3$ to give Shape H.

- 5) Triangle I is enlarged by a scale factor of $\frac{1}{2}$, centre of enlargement $(0, -1)$ and is then reflected in the line $y = -x$ to give Triangle J.

- 6) Shape K is first translated by the vector $\begin{pmatrix} 0 \\ 4 \end{pmatrix}$ and is secondly rotated by 90° anti-clockwise about the point $(-1, 0)$ to give Shape L.

Organizational Data Mining: Leveraging Enterprise Data Resources for Optimal Performance Nemati, Hamid, Barko, Christopher D., 2003-07-01 Mountains of business data are piling up in organizations every day These organizations collect data from multiple sources both internal and external These sources include legacy systems customer relationship management and enterprise resource planning applications online and e commerce systems government organizations and business suppliers and partners A recent study from the University of California at Berkeley found the amount of data organizations collect and store in enterprise databases doubles every year and slightly more than half of this data will consist of reference information which is the kind of information strategic business applications and decision support systems demand Kestelyn 2002 Terabyte sized 1 000 megabytes databases are commonplace in organizations today and this enormous growth will make petabyte sized databases 1 000 terabytes a reality within the next few years Whiting 2002 By 2004 the Gartner Group estimates worldwide data volumes will be 30 times those of 1999 which translates into more data having been produced in the last 30 years than during the previous 5 000 Wurman 1989

Legal Knowledge and Information Systems Víctor Rodríguez-Doncel, 2019-12-15 In recent years the application

of machine learning tools to legally relevant tasks has become much more prevalent and the growing influence of AI in the legal sphere has prompted the profession to take more of an interest in the explainability trustworthiness and responsibility of intelligent systems This book presents the proceedings of the 32nd International Conference on Legal Knowledge and Information Systems JURIX 2019 held in Madrid Spain from 11 to 13 December 2019 Traditionally focused on legal knowledge representation and engineering computational models of legal reasoning and analyses of legal data more recently the conference has also encompassed the use of machine learning tools A total of 81 submissions were received for the conference of which 14 were selected as full papers and 17 as short papers A further 3 submissions were accepted as demo presentations resulting in a total acceptance rate of 41.98% with a competitive 25.5% acceptance rate for full papers The 34 papers presented here cover a broad range of topics from computational models of legal argumentation case based reasoning legal ontologies and evidential reasoning through classification of different types of text in legal documents and comparing similarities to the relevance of judicial decisions to issues of governmental transparency The book will be of interest to all those whose work involves the use of knowledge and information systems in the legal sphere Can Every School Succeed?

Brian K. Creasman, Jesse Bacon, David Franklin, 2018-03-13 The goal of Can Every School Succeed? is to aid school leaders in the process of transforming today's schools The book is based on principles that the authors have developed as school leaders through their experience in transforming low performing schools into high achieving schools Many schools begin the transformation process only to fail because they do not identify and communicate the goals for change As schools continue to struggle with the many complexities that they face transformation is needed In response to this this book offers school leaders practical transformation principles that will ensure the transformation process is simple concise and remains focused on creating the best learning environment for students Communicating Knowledge Denise Bedford, Ira Chalphin, Karen Dietz, Karla Phlypo, 2022-01-27

Communicating Knowledge addresses essential management practices in the 21st century knowledge economy It speaks to the change that every organization is experiencing as they transition from an industrial to a knowledge organization **A Low-Cost Approach to PCR** Eva Harris, 1998-12-31 The polymerase chain reaction PCR is a technique used to replicate specific pieces of DNA millions of times which permits the detection and analysis of minute amounts of nucleic acids Since its introduction in the late 1980s this technique has been applied not only in molecular biology research but also in fields as diverse as anthropology phylogeny and forensics However despite the large impact of PCR many of its applications remain within the confines of research and the academic environment Now in **A Low Cost Approach to PCR** Appropriate Transfer of Biomolecular Techniques Dr Eva Harris makes this elegantly simple technique more accessible to researchers physicians and laboratory workers throughout the world She provides a description of the theoretical basis of the technique the practical details of the method and the philosophy behind the technology transfer program that she developed over the last ten years The book serves as a guide for potential users in developing countries and

for scientists in developed countries who may wish to work abroad In addition the low cost approach outlined in this book can be useful for high school undergraduate or continuing education programs in the United States While the specific applications of PCR outlined in the book are immediately useful to the study of infectious diseases the approach presented can be generalized to a number of other technologies and situations The book will help laboratories in many areas of the world generate information on site for use by physicians epidemiologists public health workers and health policy professionals to develop new strategies for disease control
