- Laws of Refraction

Learning Outcomes

After completing this lesson you will be able to

- explain the laws of reflection
- identify examples of reflection in daily life
- compare the refraction of light through substances of different densities
- explain how reflection and refraction produce natural phenomena

How Does Light Interact with Objects?

At the beginning of this unit, when you were brainstorming what you knew about light, you may have included some of the ways that light interacts with objects. In Grade 4 you learned that objects can be classified as **transparent** (let light pass through) or **opaque** (don't let light pass through). In this section you'll examine in more detail what happens when light interacts with opaque objects that are reflective in nature, and also with transparent objects.

Question: Reflection

** Text p. 222 + 223*

There are many instances where a **reflection** can be observed in everyday life, for example, your face in a bathroom mirror. What are other examples of where you might encounter your reflection over the course of a day? Give two or three examples.

store security mirrors
car mirrors, school bus mirrors,
cosmetic mirrors

In order to explain how light reflects, scientists have created the **Law of Reflection**. You'll explore this law in the following pages.

, 1920 **Writing as a Learning Tool** Päivi Tynjälä, L. Mason, K. Lonka, 2012-12-06 In a brief summary the debate concerning the nature of writing processes is about whether the essential characteristic of expertise in writing is a matter of mastering problem solving strategies In this respect the role of social and interactive factors such as writers familiarity with the particular genre in which they are writing and their relationship with the discourse community in which they are participating have been pointed out e g Nystrand 1989 According to the socio interactive approach which refers to Vygotsky's theory the composition process is a dialogue between the writer and the reader made possible by socially shared knowledge

The meaning of a text is a social construct that is negotiated between the reader and the writer through the medium of the text. The importance of motivational aspects has also been highlighted by two main lines of research studies of the relationship between writing and self efficacy e.g. Pajares, Benton, Corkill, Sharp, Downey, Khamtsova, 1995; Hidi, McLaren, 1990; 1991. Self efficacy in this context individuals' beliefs about their ability to produce certain types of texts have been found to be predictive of writing skills, strategy use and writing performance.
