Many readers will appreciate the clarity with which the book covers the subject without swamping them with detailed technical or product-specific information. New material in this edition includes the latest developments in refrigerants and lubricants, together with updated information on compressors, heat exchangers, liquid chillers, electronic expansion valves, controls, and cold storage. Topics also covered include efficiency, environmental impact, split systems, retail refrigeration, supermarket systems, and cold rooms, industrial systems, fans, air infiltration, and noise.

Author Information: Guy Hundy studied Mechanical Engineering at Leeds University, UK. He started his career in the refrigeration industry with J E Hall Ltd, Dartford. In 1985, he joined Copeland Europe, and in 1998, he was appointed Director of Application Engineering, Copeland Europe.
