5 pages | 1082 words

Ever since I was a little girl I always wanted to be a nurse and help people who were ill. As I got older, I got more information and decided that I wanted to become a Registered Nurse (RN). Registered nurses care for patients and educate them on health issues to prevent future illnesses. Along with technical skills necessary for the medical profession, registered nurses must have people skills to work closely with patients and their families. Becoming a RN entails formal education from a state-approved nursing school and state licensure.

There are generally three educational approaches to becoming a registered nurse. Registered nurses usually train by completing a bachelor's or associate's degree program in nursing. Less commonly, registered nurses prepare for the occupation by earning a diploma in nursing. Graduates of any of these programs are generally eligible for licensure and entry-level employment as registered nurses. Nursing students may choose from a variety of education options to become a registered nurse. Some teaching hospitals offer 3-year diploma programs in nursing; however, these programs are rare. Most RN's earn associate degrees or bachelor's degrees in nursing.

The skills needed for this job are people skills, emotional stability, CPR, First Aid and a second language would also help. I plan on taking French throughout the university so I'll be considered trilingual and I plan on updating my CPR and First Aid yearly. San Diego City College's nursing education program offers associate's degrees for students who want to become RNs, as well as a program for LVNs seeking RN certification but not the degree. Students learn through classroom study and clinical experience in health care facilities. It will take two years with open admission and the tuition for in-state is \$898. San Diego State University's School of Nursing offers programs that train entry-level RNs as well as provide working professionals with advanced studies to continue their education and careers. All bachelor's degree students must take part in an international learning experience. It's a four years with a 30% acceptance rate and the tuition for in-state is \$6,578.

There are four general duties a RN does on a daily basis. The first duty is evaluating a patient's physical, mental and emotional health. Also an RN's job is to take vital signs. The second duty is designing and carrying out a treatment plan for the patient. Also bandaging wounds, giving medicine and injections that need to be given. The third duty is to monitor the results of the patient's treatment to make sure it's working and the patient is happy with it. Also a RN tells patients about they're medical options and health issues such as nutrition and personal hygiene. The last duty is to complete and organize records about the patients. RN's job opportunities are in hospitals, nursing homes, clinics and basically any public health building. Also there are many organizations that recruit nurses to go to other countries.

England and the U.S are two of the many countries that do this. The salary for a full-time nurse is \$35,000 to \$60,000 a year. Benefits...
