Federal Register , 2012-05 **The Schenley Experiment** Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before *Brown v Board of Education* Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials

closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America s oldest public schools

Building the Federal Schoolhouse Douglas S. Reed,2014-05-29 Over the past fifty years the federal government s efforts to reform American public education have transformed U S schools from locally run enterprises into complex systems jointly constructed by federal state and local actors The construction of this federal schoolhouse an educational system with common national expectations and practices has fundamentally altered both education politics and the norms governing educational policy at the local level Building the Federal Schoolhouse examines these issues through an in depth fifty year examination of federal educational policies in the community of Alexandria Virginia a wealthy yet socially diverse suburb of Washington D C The epochal social transformations that swept through America in the past half century hit Alexandria with particular force transforming its Jim Crow school system into a new immigrant gateway district within two generations Along the way the school system has struggled to provide quality education for special needs students and has sought to overcome the legacies of tracking and segregated learning while simultaneously retaining upper middle class students Most recently it has grappled with state and federally imposed accountability measures that seek to boost educational outcomes All of these policy initiatives have contended with the existing political regime within Alexandria at times forcing it to a breaking point and at other times reconstructing it All the while the local expectations and governing realities of administrators parents politicians and voters have sharply constrained federal initiatives limiting their scope when in conflict with local commitments and amplifying them when they align Through an extensive use of local archives contemporary accounts school data and interviews Douglas S Reed not only paints an intimate portrait of the conflicts that the federal schoolhouse s creation has wrought in Alexandria but also documents the successes of the federal commitment to greater educational opportunity In so doing he highlights the complexity of the American education state and the centrality of local regimes and local historical context to federal educational reform efforts

Dangerous Or Endangered? Jennifer Tilton,2010-10-03 Tilton draws on three years of ethnographic research in Oakland California one of the nation s most racially diverse cities to examine how debates over the nature and needs of young people have fundamentally reshaped politics transforming ideas of citizenship and the state in contemporary America As parents and neighborhood activists have worked to save and discipline young people they have often inadvertently reinforced privatized models of childhood and urban space clearing the streets of

children who are encouraged to stay at home or in supervised after school programs Youth activists protest these attempts demanding a right to the city and expanded rights of citizenship Publisher **Florida Administrative Register** ,2009-06

Betrayed Laurie H. Rogers,2011-01-16 In America more money is spent from all sources on K 12 education than on the U S Department of Defense Why then are so many children suffering what amounts to educational malpractice Why are they crippled for life with a substandard education and a life altering vision of themselves as incapable *Betrayed* is a passionate well researched and frank accounting of how a failing public education system continues to be forced on teachers and students despite its nearly complete lack of supporting research or successful student outcomes *Betrayed* roots out the self styled stakeholders whose personal professional and financial interests are served by this failing system It sympathizes with teachers many of whom aren t allowed to do their jobs yet are constantly threatened with removal for ineffectiveness or insubordination *Betrayed* is an expose but it s also a beacon of commonsense and hope Through the Square of Effective Learning *Betrayed* offers practical methods for teachers parents advocates and legislators to stand up against this broken system to effect positive change and to ensure a good quality education for all of our children **Amador County Public**

Thinking Ecologically in Educational Policy and Research
Sarah Winchell Lenhoff, Jeremy Singer, Michael Gottfried, 2024-02-29 This book places a focus on educational ecosystems that is understanding the complex nature of educational experiences and promoting a coordinated set of policy and practice solutions to address interrelated problems that manifest in school and student outcomes Educational policy and politics have been dominated by school improvement initiatives that locate educational problems and solutions in schools themselves rather than in the systemic and structural roots of those problems segregation poverty and histories of compounding inequality Youth outcomes that we associate with schools e g achievement attendance graduation are the consequences of systemic structural and environmental factors that interact with the lived experiences of students in their communities and schools This insightful volume provides examples of how to understand and analyse educational issues ecologically and evidence on the opportunities and challenges with forging cross sector partnerships to address educational issues ecologically Thinking Ecologically in Educational Policy and Research will be a key resource for practitioners and researchers of education leadership and policy educational administration educational research educational studies and sociology This book was originally published as a special issue of the Peabody Journal of Education [In Silence or Indifference](#) Wayne A. Wiegand, 2024-08-30 Librarians around the country are currently on a battleground defending their right to purchase and circulate books dealing with issues of race and systemic racism Despite this work the library community has often overlooked even ignored its own history of White supremacy and deliberate inaction on the part of White librarians and library leadership Author Wayne A Wiegand takes a crucial step to amend this historical record In Silence or Indifference Racism and Jim Crow Segregated Public School Libraries analyzes and critiques the world of professional librarianship between 1954 and 1974 Wiegand begins by identifying racism in the practice and customs of public school libraries in the years leading up to the Brown v Board of Education decision This culture permeated the next two decades as subsequent Supreme Court decisions led to feeble and mostly unsuccessful attempts to integrate Jim Crow public schools and their libraries During this same period the profession was honing its national image as a defender of intellectual freedom a proponent of the freedom to read and an opponent of censorship Still the community did not take any unified action to support Brown or to visibly oppose racial segregation As Black school librarians and their Black patrons suffered through the humiliations and hostility of the Jim Crow educational establishment the American library community remained largely ambivalent and silent The book brings to light a distressing history that continues to impact the library community its students and its patrons Currently available

school library literature skews the historical perspective that informs the present In Silence or Indifference is the first attempt to establish historical accountability for the systemic racism contemporary school librarianship inherited in the twenty first century **Nominations to the Department of Transportation, the Executive Office of the President, and the Department of Commerce** United States.
