Roy, Eric Wajnberg, 2008-01-26 *Harmonia axyridis* has been described as the most invasive ladybird on Earth It has a long history of use as a classical biological control agent in the USA and more recently in Europe This beetle has been effective at controlling pest insects in a variety of crop systems but it poses unacceptable risks by impacting on non target species as both an intraguild predator and competitor Written by renowned scientists this book is a synthesis of recent research on *H. axyridis* and provides informative insights into current perspectives and future directions Biological control is an essential component of sustainable agriculture but the distinction between a

successful biological control agent and an invasive species can be narrow We hope that lessons can be learnt from *H. axyridis*
