Carpenter, 2023-02-09 Ever since the beginning of the world man has contained within him an insatiable desire to be the captain of his own ship and master of his own fate It s a natural flaw in man in our fallen state It really becomes problematic when pride prevents one from looking outside their selves for help or for the correct answers in life It s not that God has abandoned us with no direction or answers it is simply the failure to launch in oneself a humbling posture to allow us to receive that which God has given to us freely his wisdom If any of you lacks wisdom let him ask God who gives generously to all without reproach and it will be given him Jas 1 5 ESV After years of history on display man makes the same mistake every day He understands what faith is and knows how to apply it but fails to seek out wisdom to point him in the right direction to place his faith Where you place your faith determines the directions your path of life will be Will you travel the long hard pothole ridden dusty road or the wellpaved smooth and straight road that sojourners decided to take before you to success Why not follow them and make it easier on yourself The book is my commentary of examples from my life where it seemed I always did it the hard way Taking the wrong road because I trusted my feelings instead of the trusted GPS men never stop to ask for directions I wrote this book from my failures and my search for truth to help others reach for wisdom in decision making processes Of course everyone still has that great gift from God of freedom of choice to make decisions in what they think is right In the end it may lead to the lemonade stand Proverbs 14 12 *Fall In Love With Money* Marta Skik

The General Economic Theory Wei-Bin Zhang, 2020-08-27 This book develops a general economic theory that integrates various economic theories and ideas and establishes important relationships between economic variables that are not formally recognized in the economic literature. The author demonstrates how the basic model is integrated with neoclassical growth theory, Walrasian general equilibrium theory, and Ricardian distribution theory, and how these theories can be incorporated through a single set of equations with a microeconomic basis. The book offers new insights into income and wealth distribution between heterogeneous households, racial and national differences in growth and development, interdependence between different stock variables with portfolio choices among different markets. It will appeal to scholars and economists interested in an integrative theoretical approach to this discipline.
