Doing Gender Justice Shui-yin Sharon Yam,Natalie Fixmer-Oraiz,2025-03-25 How reproductive justice birth workers and queer parents build kinships and care relations that resist oppressive structures Anti trans policies that restrict the boundaries of gender reproduction and family formation are a dangerous form of reproductive injustice with grave impacts on trans nonbinary and gender nonconforming people In *Doing Gender Justice* Shui yin Sharon Yam and Natalie Fixmer Oraiz explore the intricate intersections of gender race and reproductive politics to illuminate how language and care practices can be reshaped to promote transformations at the structural level and in small everyday ways Only by enacting justice oriented forms of reproductive care and relations Yam and Fixmer Oraiz contend could activists and health care workers challenge the dominant affective and ideological investments in binary gender and its complicity in white supremacy Set against a backdrop of relentless anti trans legislation and attacks on bodily autonomy this groundbreaking work shares the lived experiences and advocacy of queer and trans parents gender inclusive birth workers and reproductive justice activists Through rich storytelling and rigorous analysis of ethnographic data and cultural artifacts the authors highlight innovative tactics that trans and nonbinary people use to dismantle oppressive systems and create a more expansive definition of family and kinship Organized to examine how the dominant gender system influences discursive and cultural practices in multiple contexts this book amplifies rhetorical inventions and tactics deployed by reproductive justice advocates birth workers and queer people who have created trans inclusive spaces for reproduction and family making *Doing Gender Justice* offers a compelling vision for a world where all forms of family and kinship are possible and where reproductive justice can be advanced in a deeply intersectional and coalitional way

Soybean Breeding for Abiotic Stress Tolerance: Towards Sustainable Agriculture Huatao Chen,Donghe Xu,Henry T. Nguyen,Li Song,Chengfu Su,2025-05-07 Soybeans hold immense global importance as one of the most significant crops worldwide due to their numerous applications and high demand They

are cultivated in countries such as the United States Brazil Argentina and China among others Soybeans can be grown as cash crops or as part of crop rotation systems aiding in soil fertility improvement 1 Food and Feed Soybeans are a major source of plant based protein making them an essential component in the global food supply chain They undergo processing to produce a wide range of food products including tofu soy milk meat substitutes and cooking oils Additionally soybean meal a byproduct of oil extraction serves as animal feed for livestock poultry and aquaculture industries 2 High Yield and Versatility Soybeans exhibit relatively high yields per acre compared to many other crops This characteristic coupled with their adaptability to various climates and soil types positions them as an economically valuable and versatile crop for farmers 3 Biodiesel Production Soybean oil can serve as a feedstock for biodiesel production offering a renewable and environmentally friendly alternative to fossil fuels The demand for biodiesel has risen in recent years due to concerns about climate change and the need for sustainable energy sources 4 Crop Rotation and Soil Health Soybeans are commonly integrated into crop rotation systems to enhance soil fertility and reduce pest and disease pressure They have the capacity to fix nitrogen from the atmosphere which enhances soil nitrogen levels and diminishes the requirement for synthetic fertilizers in subsequent crops

Security, Education and Development in Contemporary Africa M. Raymond Izarali, Oliver Masakure, Edward Shizha, 2016-12-01 This volume delineates the critical link among security education and development in Africa and provides a multidisciplinary framework of analyses and possible solutions Africa has had a long history that embodies layers of mass scale criminality and exploitation not merely from neocolonial and apartheid policies but also from political greed This has impacted adversely on security education and development in a way that deprivation of education and underdevelopment in turn re creates security issues The volume aims firstly to help augment scholarly inquiry into the nexus among in security education and development through the multidisciplinary framework of analyses secondly to provide policymakers and educators with tools and a framework to comprehend the complexity and magnitude of the issues to which they ought to be sensitive and respond and finally to provide caregivers and childcare agencies of the state a comprehensible framework of underlying multifaceted sources of trauma experienced by children in extraordinary circumstances It is organized in four sections theoretical conceptualization on security and development country cases on security and development security and educational development and country cases on security and education Serving as a significant compass to understand and respond to the complex interplay and impact of security education and development in Africa it is of great use to graduates and scholars interested in Africa Politics IPE security studies and development studies

The Seabuckthorn Genome Prakash C. Sharma, 2022-11-23 This work is the first compilation of comprehensive deliberations on botany cytogenetics and sex determination genetic resources and diversity classical breeding molecular markers and genome sequence resources and application of omics technology including transcriptomics proteomics and metabolomics resources in the multipurpose medicinal plant seabuckthorn The book also presents a detailed narrative on antioxidative radioprotective

nutraceutical and medicinal applications of seabuckthorn products A detailed treatment has been included on analytical techniques and processing technologies Altogether the book contains about 300 pages over 17 chapters contributed by globally reputed experts on the relevant field in this important plant species This book will be useful to the research students teachers and scientists in the academia and private sector engaged in horticulture genetics breeding molecular biology biotechnology and breeding The book will also be a useful source for workers involved in the development of plant based medicines nutraceuticals therapeutics and cosmeceuticals and extension workers involved in the development of rural farmers and small scale industries *Hairy Root Cultures Based Applications* Vikas Srivastava, Shakti Mehrotra, Sonal Mishra, 2020-06-27 The book discusses the various methods and protocols available in hairy root culture based research The utilization of Agrobacterium mediated genetic transformation and establishment of hairy root cultures has paved the way for large scale secondary metabolite production in medicinal plants Presenting recent research and offering insights from eminent research groups the book covers a range of topics related to hairy root based applications including i establishment of hairy roots and native production of SM ii yield enhancement strategies for increased SM production like elicitation iii hairy roots as a tool for value added applications such as plant microbe interaction characterization of plant genes and root biology studies As such it is an informative guide and experimental manual for researchers in diverse fields of plant biology

AMP-activated Protein Kinase Mario D. Cordero, Benoit Viollet, 2016-11-02 AMPK has emerged as an important integrator of signals that control energy balance through the regulation of multiple biochemical pathways in eukaryotes This book focuses on the implications of AMPK as a master metabolic regulator in diseases including new methods and animal models The contributions are written by leading experts in the field and give an extensive overview of the current knowledge of AMPK biology and the role of AMPK in health and disease

Microalgae Biotechnology for Development of Biofuel and Wastewater Treatment Md. Asraful Alam, Zhongming Wang, 2019-04-30 This book addresses microalgae which represent a very promising biomass resource for wastewater treatment and producing biofuels Accordingly microalgae are also an expanding sector in biofuels and wastewater treatment as can be seen in several high profile start ups from around the globe including Solix Biofuels Craig Venter's Synthetic Genomics PetroSun Chevron Corporation ENN Group etc In addition a number of recent studies and patent applications have confirmed the value of modern microalgae for biofuels production and wastewater treatment systems However substantial inconsistencies have been observed in terms of system boundaries scope the cultivation of microalgae and oil extraction systems production costs and economic viability cost lowering components etc Moreover the downstream technologies and core principles involved in liquid fuel extraction from microalgae cells are still in their early stages and not always adequate for industrial production Accordingly multilateral co operation between universities research institutes governments stakeholders and researchers is called for in order to make microalgae biofuels economical Responding to this challenge the book begins with a general introduction to microalgae and

the algae industry and subsequently discusses all major aspects of microalgal biotechnology from strain isolation and robust strain development to biofuel development refinement and wastewater treatment

Writing and Desire Jonathan Alexander, 2023-06-06 Writing and Desire is a sustained multimovement exploration of how writers particularly queer writers think and feel through desire as central to their writing practice In a time of political social global and ecological unrest how might we understand desire the desire for things to be different the desire for a better world as a crucial dimension of contemporary human experience What might such a recentering of desire offer us personally and politically And how is writing itself as one of the primary ways through which we express and explore ourselves central to the expression and exploration of desire Drawing on recent theoretical work in queer theory and the new materialism Jonathan Alexander studies a range of queer and trans writers and artists who center desire in their practice and argues that conceptualizing writing as desire allows us to reexperience both writing and our world as saturated with our dreams and wishes for change In a book both elegant and unsettling and by turns personal analytic and experimental Alexander challenges us and himself to think about desire and writing as the deepest manifestation of our hopes for the future

Emerging Bioinformatic Tools in Toxicogenomics Danyel Jennen, Paul Jennings, 2020-02-27 Toxicogenomics was established as a merger of toxicology with genomics approaches and methodologies more than 15 years ago and considered of major value for studying toxic mechanisms of action in greater depth and for classification of toxic agents for predicting adverse human health risks While the original focus was on technological validation of in particular microarray based whole genome expression analysis transcriptomics mainly through cross comparing different platforms for data generation MAQC I it was soon appreciated that actually the wide variety of data analysis approaches represents the major source of inter study variation This led to early attempts towards harmonizing data analysis protocols focusing on microarray based models for predicting toxicological and clinical end points and on different methods for GWAS data MAQC II Simultaneously further technological developments geared by increasing insights into the complexity of cellular regulation enabled analyzing molecular perturbations across multiple genomics scales epigenomics and microRNAs metabolomics While these were initially still based on microarray technology this is currently being phased out and replaced by a variety of next generation sequencing based methods enabling exploration of genomic responses to toxicants at even greater depth SEQC I This raises the demand for reliable and robust data analysis approaches ranging from harmonized bioinformatics concepts for preprocessing raw data to non supervised and supervised methods for capturing and integrating the dynamic perturbations of cell function across dose and time and thus retrieving mechanistic insights across multiple regulation scales Traditional toxicology focused on dose dependently determining apical endpoints of toxicity With the advent of toxicogenomics efforts towards better understanding underlying molecular mechanisms has led to the development of the concept of Adverse Outcome Pathways which are basically presented as a structural network of linearly related gene gene interactions regulating key events for inducing

apical toxic endpoints of interest Impulse challenges from exposure of biological systems to toxic agents will however induce a cascade type of events presenting both adverse and adaptive processes thus requiring bioinformatics approaches and methods for complex dynamic data generated not only across dose but clearly also across time Currently time resolved toxicogenomics data sets are increasingly being assembled in the course of large scaled research projects for instance devoted towards developing toxicogenomics based predictive assays for evaluating chemical safety which are no longer animal based

Coupling and Uncoupling: Dynamic Control of Membrane Contacts Dan Zhang,Yasunori Saheki,Benoît Kornmann,Junjie Hu,2021-08-31 *Grain World* ,1910 *Interactions Between China's National Emissions Trading Scheme and Electricity Market: Practices and Policies* Tsun Se Cheong,Xunpeng (Roc) Shi,Yongping Sun,Jian Yu,Xin Yao,2023-11-03 China's national carbon market the world's largest emissions trading scheme ETS kicked off its first online trade recently This can be called a milestone for the country towards the nation's goals of having CO2 emissions peak before 2030 and achieving carbon neutrality by 2060 China's national ETS initially covers the power sector before being expanded to a much broader set of energy intensive industries On one hand the electricity sector the largest carbon emitting industry is responsible for about 40% of China's emissions and it has great significance to response to global climate change On the other hand the effectiveness of China's ETS will rest on how well it is coordinated with power market regulations and policies In this regard the deepening of reform as well as the advanced technology and its applications in the electricity market will add new challenges and opportunities to electricity trade which in turn influences national ETS Therefore this brings urgency to accurately capture the dynamic interactions between national ETS and electricity market to transform carbon trading into a practical and effective way to decarbonize the power sector

Drug Repurposing in Cancer Therapy Kenneth K.W. To,William C.S. Cho,2020-07-29 *Drug Repurposing in Cancer Therapy Approaches and Applications* provides comprehensive and updated information from experts in basic science research and clinical practice on how existing drugs can be repurposed for cancer treatment The book summarizes successful stories that may assist researchers in the field to better design their studies for new repurposing projects Sections discuss specific topics such as in silico prediction and high throughput screening of repurposed drugs drug repurposing for overcoming chemoresistance and eradicating cancer stem cells and clinical investigation on combination of repurposed drug and anticancer therapy Cancer researchers oncologists pharmacologists and several members of biomedical field who are interested in learning more about the use of existing drugs for different purposes in cancer therapy will find this to be a valuable resource Presents a systematic and up to date collection of the research underpinning the various drug repurposing approaches for a quick but in depth understanding on current trends in drug repurposing research Brings better understanding of the drug repurposing process in a holistic way combining both basic and clinical sciences Encompasses a collection of successful stories of drug repurposing for cancer therapy in different cancer types
