Exam Study System Praxis II Exam Secrets Test Prep, 2014-03-31 Covers the major content areas on the exam *An Aesthetic Critique of Digital Enhancement* Sarah Bianchi, 2023-09-11 The socio cultural phenomenon of digital enhancement that is the attempt to perfect the subject's offline life by means of digital media seduces people into participating in digitalization Subjects paradoxically want to participate in digital change even though it is well known that digitalization also impairs their freedom and privacy and this book investigates both the freedom impairing and the freedom enhancing aspects of digital enhancement Sarah Bianchi provides an empirically informed critical aesthetic diagnosis a perspective that makes the overlooked affect and power sensitive Janus face of subjectivity in digital enhancement perceivable the subjects desire to be governed by the logic of perfection that is the heart of digital enhancement and their simultaneous desire for self government To this end *An Aesthetic Critique of Digital Enhancement Government of the Self and Desire* makes Foucault's history of the present in its Nietzschean genealogy productive for contemporary critical thought on digital enhancement Through genealogical critique this approach provides the needed semantics to question the costs of our digital present and to conceptualize how an enlightened agency might be critically constructed *The Myth of Decolonization and the Global South* Ahmed W. Waheed, 2025-09-26 In recent years scholars of International Relations have increasingly turned their attention to the question of how to decolonize knowledge While emerging debates and initiatives mark a critical step toward exposing the discipline's embedded power structures there remains a striking lack of systematic empirical research into how these asymmetries are reproduced and experienced within the Global South itself This book explores the colonality of power and knowledge in Pakistan through an examination of Pakistani International Relations It not only unveils the hegemonic processes embedded within the western capitalist structures of knowledge production but also explores how the eurocentrism of International Relations in Pakistan is sustained and maintained through a colonality of knowledge and power which is designed to promote western epistemologies and emulate western standards This book consequently provides a view of epistemic oppression from below In doing so it is an initial attempt to explore how the process of decolonization can begin to address the issues embedded in the colonality of knowledge demonstrated through an exploration of the International Relations discipline in Pakistan Praxis der Viszeralchirurgie Jörg Rüdiger Siewert, Matthias

On Subject and Theme

Ruqaiya Hasan, Peter Howard Fries, 1995 The ten papers in this volume focus on Subject and Theme. Theme began its life as a semantic notion in the work of Vilém Mathesius while Subject has traditionally been seen as just a syntactic entity. More recently two related perspectives on these concepts have attracted linguists' attention: the formal criteria for their recognition and the relations between the two concepts. Using the systemic functional model as their point of departure, the papers in the present volume consider the two notions in a wider context by relating them to the interpersonal and textual metafunctions of language. By contrast with the current linguistic approaches, the primary focus here is neither simply on formal recognition criteria nor on the relation of these elements to each other; instead, the notions of Subject and Theme are examined from the point of view of their function in the economy of discourse, with studies of their significance in English and French as well as in a range of non-Indo-European languages. Definitions of the concepts are offered on the basis of their discourse functions, which are also important in selecting the formal recognition criteria and in understanding their mutually supportive role vis-à-vis each other. Most of the papers in the volume are a selection from presentations made at the 19th International Systemic Functional Congress at Macquarie University.
