1. Major American and foreign manufacturers use the correlation coefficient as a quality test. The score is calculated the percentage of all of unbalanced engines of that type, compared to some new standards with better efficiency and it ranges from zero to greater than 100%. These ranges of numbers compare the new model.

$$MA = 1.96 \sqrt{\frac{p(1-p)}{n}}$$

$$\hat{p} = 0.5$$

$$\left(\frac{MA}{1.96}\right)^2 = \sqrt{\frac{p(1-p)}{n}}$$

$$n = \frac{25}{0.0153^2}$$

$$n = (0.0153)^2 = \frac{25}{0.00023409} = 10682$$

2. Many national statistical agencies use the 95% confidence interval to estimate the percentage of the population that are in a certain category. For example, the 95% confidence interval of a survey of about 50,000 people shows that a sample of 1000 subjects is sufficient to estimate the proportion of the 50,000 subjects for within 1% confidence interval.

$$\frac{MA}{1.96} = \sqrt{\frac{p(1-p)}{n}}$$

$$1.96 = 1.96 = \frac{50}{\sqrt{n}} \cdot 1.96$$

$$2 = 1.96 = \frac{50}{\sqrt{n}}$$

$$\sqrt{n} = \frac{50}{2}$$

$$n = 2500$$

3. A college student organization wants to estimate the percentage of students under the age of 25. The survey was for the year. The organization will accept an error of 3% of students and students of all of the surveyed population. The error of estimation. The survey organization is required to obtain a 95% confidence interval with a margin of error of at most 3% when the confidence interval is 95%.

$$\frac{MA}{1.96} = \frac{1.96}{1.96} \sqrt{\frac{p(1-p)}{n}}$$

$$n = 0.03^2 \cdot \frac{1875}{0.0009}$$

$$0.03^2 = \sqrt{\frac{p(1-p)}{n}}$$

$$n = \frac{1875}{0.0009}$$

$$= 2083.3$$

earlier you begin the more time you will have to sharpen your skills Do not procrastinate Cramming is not an effective way to study since it does not allow you the time needed to learn the test material It is very important for you to choose the time and place for studying that works best for you Some students may set aside a certain number of hours every morning to study while others may choose to study at night before going to sleep Other students may study during the day while waiting on a line or even while eating lunch Only you can determine when and where your study time will be most effective But be consistent and use your time wisely Work out a study routine and stick to it When you take the practice exam s try to make your testing conditions as much like the actual test as possible Turn your television and radio off and sit down at a quiet table free from distraction Make sure to time yourself Complete the practice test s score your test s and thoroughly review the explanations for the questions you answered incorrectly However do not review too much during any one sitting Concentrate on one problem area at a time by reviewing the question and explanation and by studying our review s until you are confident that you completely understand the material Since you will be allowed to write in your test booklet during the actual exam you may want to write in the margins and spaces of this book when practicing However do not make miscellaneous notes on your answer sheet Mark your answers clearly and make sure the answer you have chosen corresponds to the question you are answering Keep track of your scores This will enable you to gauge your progress and discover general weaknesses in particular sections You should carefully study the reviews that cover the topics causing you difficulty as this will build your skills in those areas To get the most out of your studying time we recommend that you follow the Study Schedule It details how you can best budget your time

TEST TAKING TIPS Although you may be unfamiliar with tests such as the Advanced Placement exams there are many ways to acquaint yourself with this type of examination and help alleviate your test taking anxieties Listed below are ways to help yourself become accustomed to the AP exam some of which may also be applied to other standardized tests Become comfortable with the format of the AP Examination in Statistics When you are practicing to take the exam s simulate the conditions under which you will be taking the actual test s You should practice under the same time constraints as well Stay calm and pace yourself After simulating the test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual test much more confidently Know the directions and format for each section of the exam Familiarizing yourself with the directions and format of the different test sections will not only save you time but will also ensure that you are familiar enough with the AP exam to avoid anxiety and the mistakes caused by being anxious Work on the easier questions first If you find yourself working too long on one question make a mark next to it in your test booklet and continue After you have answered all of the questions that you can go back to the ones you have skipped Use the process of elimination when you are unsure of an answer If you can eliminate three of the answer choices you have given yourself a fifty fifty chance of getting the item correct since there will only be two choices left from which to make a guess If you cannot eliminate at least three of the answer choices you may choose not to guess as you will be

penalized one quarter of a point for every incorrect answer Questions not answered will not be counted Be sure that you are marking your answer in the oval that corresponds with the correct item in the test booklet Since the multiple choice section is graded by machine marking the wrong answer will throw off your score
