**Teaching School Mathematics: Pre-Algebra** Hung-Hsi Wu;,2016-06-29 This is a systematic exposition of a major part of the mathematics of grades 5 to 8 excluding statistics written specifically for Common Core era teachers It differs from other books for teachers in that the mathematics is correct in the sense that all the concepts are clearly and correctly defined and a grade appropriate explanation that is proof is given for every assertion For example it gives a precise definition of percent and explains how to use the definition to do all the standard problems about percent in an entirely routine manner It also gives a leisurely explanation for negative times negative is positive Another key feature is an intuitive introduction to plane geometry via rotations translations reflections and dilations that instead of treating these transformations as merely fun activities shows how they make sense of the usual geometric topics in middle school including congruence similarity length area and volume In short the readers will find in this volume a clear explanation of whatever was once puzzling to them in the mathematics of grades 5 to 8

The Learning Equation Pre-Algebra Acerra, 2003-08. TLE is designed for learner focused computer classroom lab based and distance learning courses. Adopting institutions receive and have license to install all TLE courses on their campus computers even if they only adopt and have students purchase TLE for one section of one course. The pedagogical model employs a Guided Inquiry approach whereby students construct their own understanding of concepts. Instead of passively being fed information students are actively involved in tasks requiring them to discover or apply mathematical concepts. The browser based course management system that accompanies TLE allows for the easy creation of algorithmically generated machine graded free response mathematics practice quizzes and tests giving instructors the power to assess student understanding of skills in a more meaningful way. Because the testing and course management system is browser based it can be used on a stand alone or networked computer or any computer with Internet access giving instructors the power to access course management information such as student progress time on task and grades anytime anywhere. Students working off campus can access

TLE assignments using the Internet anytime Adopting institutions may use Cengage Learning servers for course management at no additional cost
