Natural Language Processing and Information Systems Farid Meziane, Elizabeth Métais, 2004-07-28. Welcome to NLDB04 the Ninth International Conference on the Application of Natural Language to Information Systems held at the University of Salford UK during June 23-25 2004. NLDB04 follows on the success of previous conferences held since 1995. Early conferences then known as Application of Natural Language to Databases hence the acronym NLDB were used as a forum to discuss and disseminate research on the integration of natural language and databases and were mainly concerned with natural language based queries, database modelling and user interfaces that facilitate access to information. The conference has since moved to encompass all aspects of Information Systems and Software Engineering. Indeed the use of natural language in systems modelling has greatly improved the development process and benefited both developers and users at all stages of the software development process. The latest developments in the field of natural language and the emergence of new technologies has seen a shift towards storage of large semantic electronic dictionaries, their exploitation and the advent of what is now known as the semantic web. Information extraction and retrieval, document and content management, ontology development and management and natural language conversational systems are becoming regular tracks in the last NLDB conferences. NLDB04 has seen a 50% increase in the number of submissions and has established itself as one of the leading conferences in the area of applying natural language to information systems in its broader sense.

FCC Record United States. Federal Communications Commission, 2008. , **A Postphenomenological Inquiry of Cell Phones** Galit Wellner, 2015-11-11. Why does the announcement of a new cellphone model ignite excitement and passion? Why do most people return home when they forget their cellphones while only few would return for their wallets? How did the cellphone technology become so dominant for many of us? This book offers an analysis of the historical evolution and of the meanings of this technology in the lives of billions of people. The book offers a unique point of view on the cellphone that merges genealogical analysis of its development since the 1990s and philosophical insights into a coherent analytical framework. With new concepts like

histories of the future and memory prosthesis the book aims to explain the excitement arising from new model announcements and the ever growing dependency on the cellphone through the framing of these experiences in wide philosophical contexts It is the first philosophical analysis of the important roles the cellphone plays in contemporary everydayness

Statistical Modeling for Computer-Aided Design of MOS VLSI Circuits Christopher Michael,Mohammed Ismail,2012-12-06 As MOS devices are scaled to meet increasingly demanding circuit specifications process variations have a greater effect on the reliability of

circuit performance For this reason statistical techniques are required to design integrated circuits with maximum yield Statistical Modeling for Computer Aided Design of MOS VLSI Circuits describes a statistical circuit simulation and optimization environment for VLSI circuit designers The first step toward accomplishing statistical circuit design and optimization is the development of an accurate CAD tool capable of performing statistical simulation This tool must be based on a statistical model which comprehends the effect of device and circuit characteristics such as device size bias and circuit layout which are under the control of the circuit designer on the variability of circuit performance The distinctive feature of the CAD tool described in this book is its ability to accurately model and simulate the effect in both intra and inter die process variability on analog digital circuits accounting for the effects of the aforementioned device and circuit characteristics Statistical Modeling for Computer Aided Design of MOS VLSI Circuits serves as an excellent reference for those working in the field and may be used as the text for an advanced course on the subject
