

Perl Best Practices

Reference Guide

Code Layout

1. Brace and parenthesize in RAR style.
2. Separate your control keywords from the following opening bracket.
3. Don't separate subroutines or variable names from the following opening bracket.
4. Don't use unnecessary parentheses for routine and temporary handles.
5. Separate complex keys or indices from their surrounding brackets.
6. Use whitespace to help binary operators stand out from their operands.
7. Place a semicolon after every statement.
8. Place a comma after every value in a multiline list.
9. Use 78-column lines.
10. Use four-column indentation levels.
11. Indent with spaces, not tabs.
12. Never place two statements on the same line.
13. Code in paragraphs.
14. Don't clobber an `else`.
15. Align corresponding items vertically.
16. Break long expressions before an operator.
17. Factor out long expressions in the middle of statements.
18. Always break a long expression at the operator of the lowest possible precedence.
19. Break long assignments before the assignment operator.
20. Format cascaded ternary operators in columns.
21. Parenthesize long lists.
22. Enforce your chosen layout style mechanically.

Naming Conventions

23. Use grammatical templates when naming identifiers.
24. Name handles after their associated bot.
25. Mark variables that store references with a `_ref` suffix.
26. Name arrays in the plural and handles in the singular.
27. Use underscores to separate words in multilevel identifiers.
28. Distinguish different program components by case.
29. Note down the prefix.
30. Abbreviate only when the meaning remains unambiguous.
31. Avoid using referentially ambiguous words in names.
32. Prefix for internal use only subroutines with an underscore.

Values and Expressions

33. Use interpolating string delimiters only for strings that actually interpolate.
34. Don't use `""` or `''` for an empty string.
35. Don't write one-character strings in visually ambiguous ways.
36. Use named character escapes instead of numeric escapes.
37. Use named constants, but don't use `constant`.
38. Don't pad decimal numbers with leading zeros.

39. Use underscores to improve the readability of long numbers.
40. Lay out multiline strings over multiple lines.
41. Use a heredoc when a multiline string exceeds two lines.
42. Use a `delimiter` when a heredoc would compromise your indentation.
43. Make every heredoc terminate a single uppercase identifier with a standard prefix.
44. When introducing a heredoc, quote the terminator.
45. Don't use backslashes.
46. Reserve `or` for pairs.
47. Don't use commas to sequence statements.
48. Don't mix high- and low-prioridade handles.
49. Parenthesize every `or` list.
50. Use table-lookup to test for membership in lists of strings, not `any()` for membership of lists of anything else.

Variables

51. Avoid using mathematical variables.
52. Don't use package variables in your own development.
53. If you're forced to modify a package variable, *localize* it.
54. Initialize any variable you *localize*.
55. *use English* for the few familiar punctuation variables.
56. If you're forced to modify a punctuation variable, *localize* it.
57. Don't use the same magic variable.
58. Beware of any modification via `$_`.
59. Use negative indices when counting from the end of an array.
60. Take advantage of both and some slicing.
61. Use a tabular layout for slices.
62. Factor large key or index lists out of their slices.

Control Structures

63. Use block `if`, not prefix `if`.
64. Reserve prefix `if` for flow-of-control statements.
65. Don't use prefix `unless`, `for`, `while`, or `until`.
66. Don't use `unless` or `until` at all.
67. Avoid C-style `for` statements.
68. Avoid subscripting arrays or hashes within loops.
69. Never subscript more than once in a loop.
70. Use named literals as explicit `for` loop iterators.
71. Always declare a `for` loop iterator variable with `my`.
72. Use `map` instead of `for` when generating new lists from old.
73. Use `grep` and `first` instead of `for` when searching for values in a list.
74. Use `for` instead of `map` when transforming a list in place.
75. Use a subroutine call to factor out complex list transformations.
76. Never modify `$_` in a list function.
77. Avoid cascading `if`.
78. Use table-lookup in preference to cascaded equality tests.
79. When producing a value, use tabular notation.
80. Don't use `do`, `while` loops.
81. Repeat as many iterations as possible, as early as possible.
82. Don't control loop structures just to concatenate control.
83. Use `for` and `redo` instead of an irregularly created `while`.
84. Label every loop that is exited explicitly, and use the label with `next`, `last`, or `redo`.

Documentation

85. Distinguish user documentation from technical documentation.
86. Create standard POD templates for modules and applications.
87. Extend and customize your standard POD templates.
88. Put user documentation in source files.
89. Keep all user documentation in a single place within your source file.
90. Place POD as close as possible to the end of the file.
91. Subdivide your technical documentation appropriately.
92. Use block comments for major comments.
93. Use full-line comments to explain the algorithm.
94. Use end-of-line comments to point out subtleties and addenda.
95. Comment anything that has puzzled or misled you.
96. Consider whether it's better to write than to comment.
97. Use `ivariable` POD sections for longer technical discussions.
98. Check the spelling, syntax, and sanity of your documentation.

Built-in Functions

99. Don't recompute sort keys inside a `sort`.
100. Use `reverse` to reverse a list.
101. Use scalar `reverse` to reverse a scalar.
102. Use `unpack` to extract fixed-width fields.
103. Use `split` to extract simple variable-width fields.
104. Use `unpack` to extract complex variable-width fields.
105. Avoid string `eval`.
106. Consider building your sorting routine with `sort` + `block`.
107. Use `long` `sublist` instead of `index` `sublist`.
108. Make appropriate use of brace values.
109. Use `glob`, not `q*`.
110. Avoid a raw `select` for non-integer sleeps.
111. Always use a block with a `map` and `grep`.
112. Use the 'non-handle handle'.

Subroutines

113. Call subroutines with parentheses but without a leading `&`.
114. Don't give subroutines the same names as built-in functions.
115. Always inspect `$_` first.
116. Use a block of nested arguments for any subroutine that has more than three parameters.
117. Use `definedness` or `existence` tests for missing arguments.
118. Resolve any default argument values as soon as `$_` is inspected.
119. Always return scalar in scalar returns.
120. Make list-returning subroutines return the 'official' value in scalar context.
121. When there is no 'official' scalar context return value, consider `undef` or `chance` instead.
122. Don't use subroutine prototypes.
123. Always return via an explicit `return`.
124. Use a bare `return` to return failure.

IO

125. Don't use `handles` filehandles.
126. Use indirect filehandles.
127. If you have to use a package filehandle, *localize* it first.

Perl Best Practices

Marcel A. Müller

Perl Best Practices:

As recognized, adventure as with ease as experience nearly lesson, amusement, as without difficulty as promise can be gotten by just checking out a book **Perl Best Practices** after that it is not directly done, you could undertake even more around this life, vis--vis the world.

We offer you this proper as well as easy pretension to get those all. We pay for Perl Best Practices and numerous book collections from fictions to scientific research in any way. among them is this Perl Best Practices that can be your partner.

Perl Best Practices Introduction

Perl Best Practices Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Perl Best Practices Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Perl Best Practices : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Perl Best Practices : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Perl Best Practices Offers a diverse range of free eBooks across various genres. Perl Best Practices Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Perl Best Practices Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Perl Best Practices, especially related to Perl Best Practices, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Perl Best Practices, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Perl Best Practices books or magazines might include. Look for these in online stores or libraries. Remember that while Perl Best Practices, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Perl Best Practices eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Perl Best Practices full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Perl Best Practices eBooks, including some popular titles.

FAQs About Perl Best Practices Books

What is a Perl Best Practices PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it.

How do I create a Perl Best Practices PDF? There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF.

How do I edit a Perl Best Practices PDF? Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities.

How do I convert a Perl Best Practices PDF to another file format? There are multiple ways to convert a PDF to another format:

Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats.

How do I password-protect a Perl Best Practices PDF? Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file?

You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs?

Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
