This edition continues to provide this comprehensive support but also reflects the changing context of nursing care in the 21st century. It reflects the growing importance of primary health and the community, the move towards evidence based practice and the importance of the multi disciplinary team. The text is designed to emphasise the importance of holistic patient focussed nursing. It addresses health assessment and introduces students to key aspects of the medical history and physical exam. Contemporary issues such as substance misuse are also examined. Clearly written and well organised to support study, the text also features case studies, critical incidents and care plans. The chapters include extensive 2 colour artwork and are supported by current references and suggestions for further reading.
