The Hazard Called Education by Joseph Agassi Ronald Swartz, Sheldon Richmond, 2014-07-11 Joseph Agassi is known primarily among fellow academics as an exemplary historian and philosopher of science an ardent critic and disciple of Karl Popper a critical admirer of the work of Michael Polanyi and a Socratic fly with the sting of a bee for all those who wear the intellectual fashions of the day To most of Agassi's students he is known primarily as an exemplary model of the Socratic teacher The question of most urgency for educators today who care about the intellectual development of students is How do we make ready our educational institutions for more Socratic teachers The philosophical or theoretical question is Why do we want Socratic teachers In outline of the many of Agassi's educational essays selected for this book Agassi answers those questions authoritarianism or anti democracy blocks the democratic reform of educational institutions where Socratic teachers and students could find a safe haven and Socratic teaching is the main antidote to authoritarianism The removal of authoritarianism from education also removes the hazard that education has become to students to their happiness creativity and dignity as autonomous individuals

Preventing Chemical Weapons Michael Crowley, Malcolm Dando, Lijun Shang, 2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical

weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all

Transfer Pricing and Value Creation Raffaele Petruzzi,Romero J.S. Tavares Esq.,2019-09-02 Value Creation and its effects on Transfer Pricing and tax law Emerging from the OECD G20 BEPS Project a new somewhat fuzzy notion of Value Creation came to permeate not only Transfer Pricing language but also wider allocation rules and anti abuse provisions in international tax law The notion of Value Creation reframes the interpretation and application of the Arm s Length Principle ALP that is embedded in Articles 7 and 9 of the OECD Model Convention This new Value Creation notion and approach assist in understanding key enterprise functions while different industry sectors manifest these concepts in various ways Situating such notions and this approach within the law of tax treaties and analyzing terms of the OECD Transfer Pricing Guidelines alongside their factual context is the aim of this book Here law students address Transfer Pricing and Value Creation in sectors as varied as commodities trade automotive consumer products food and beverages pharmaceutical and life sciences telecommunications and the key topic of value creation in a digitalized economy Our LL M students were required to address issues not explored in legal research and to discuss factual topics relevant for Transfer Pricing All students focused on topics that are new to the international tax debate that keep evolving and on factual matters that often escape legal research

Foundations of Macroecology Felisa A. Smith,John L. Gittleman,James H. Brown,2014-08-22 Macroecology is an approach to science that emphasizes description and explanation of patterns and processes at large spatial and temporal scales Some liken it to seeing the forest through the trees an apt ecological use of the proverbial phrase The term itself was introduced to modern literature by our authors James Brown and Brian Maurer in a seminal science paper in 1989 We then published books by both of these authors including Brown s Macroecology in 1995 which quickly traveled to the shelf of classics in ecology credited with cohering and inspiring a subfield of ecology proper While macroecology is to many a modern subfield the large scale perspective it advocates is implicit in earlier publications For example in 1898 de Liocourt studied the influence of management practices on the structure of French fir forests and characterized the distribution of tree size in three different stands His findings that in natural areas the number of trees declined exponentially with increasing diameter of the trunk allowed him to draw conclusions about the influence of management practices on tree distribution patterns Similarly other classic

macroecological patterns including the species area relationship latitudinal gradient of species richness relationship between body size and metabolic rate species abundance distribution and species body size distribution were identified decades sometimes even centuries ago Consequently despite the scant twenty years that has elapsed since the term was coined macroecology has a deep and rich history Foundations of Macroecology traces and coheres that history charting an evolutionary trajectory to the rigorous macroecological research landscape science enjoys today The forty six papers span eight decades from 1920 to 1998 and include divergent perspectives of space time and taxonomic and habitat affiliation They are organized into two main parts Macroecology before Macroecology and Dimensions of Macroecology The latter is further subdivided into six sections reflecting the subject matter Allometry and Body Size Evolutionary Dynamics Abundance and Distributions Species Diversity and Methodological Advances For each reprinted paper a macroecologist specializing in that area has written original commentary that places the paper in a broader context and explains why it is foundational

The Chemical Weapons Convention Walter Krutzsch, Eric Myjer, Ralf Trapp, Jonathan Herbach, 2014 The Chemical Weapons Convention is one of the cornerstone disarmament and arms control agreements and the only global and comprehensive disarmament treaty that is being verified by an international agency This Commentary assesses the provisions of the Convention and its implementation with cross cutting chapters providing a broader analysis
