Physical Science First Paper 2014 Prelim Memorandum:

Freedom's Laboratory Audra J. Wolfe, 2020-08-04 The Cold War ended long ago but the language of science and freedom continues to shape public debates over the relationship between science and politics in the United States Scientists like to proclaim that science knows no borders Scientific researchers follow the evidence where it leads their conclusions free of prejudice or ideology But is that really the case In Freedom s Laboratory Audra J Wolfe shows how these ideas were tested to their limits in the high stakes propaganda battles of the Cold War Wolfe examines the role that scientists in concert with administrators and policymakers played in American cultural diplomacy after World War II During this period the engines of US propaganda promoted a vision of science that highlighted empiricism objectivity a commitment to pure research and internationalism Working both overtly and covertly wittingly and unwittingly with governmental and private organizations scientists attempted to decide what exactly they meant when they referred to scientific freedom or the US ideology More frequently however they defined American science merely as the opposite of Communist science Uncovering many startling episodes of the close relationship between the US government and private scientific groups Freedom s Laboratory is the first work to explore science s link to US propaganda and psychological warfare campaigns during the Cold War Closing in the present day with a discussion of the 2017 March for Science and the prospects for science and science diplomacy in the Trump era the book demonstrates the continued hold of Cold War thinking on ideas about science and politics in the United States

Using Film to Understand Childhood and Practice Sue Aitken, 2018-02-08 Using Film to Understand Childhood and

Practice is an innovative and lively text which allows complex and challenging issues within childhood studies to be explored using the medium of filmed drama. By utilising popular culture this book provides accessible narratives to students and lecturers needing to engage with complex theoretical ideas. In exposing theories to tangible situations often from more than one perspective in films readers are helped to identify and recognise how theories about children and childhood can be applied. Each chapter uses a specific film to provide the basis for discussion in order to explore and analyse key concepts within childhood studies which include identity, social construction, families, political and biological narratives, children's rights and participation. A range of international films are used including *Charlie and the Chocolate Factory*, *Rabbit Proof Fence*, *The Hunger Games* and *The Red Balloon*. First introducing the theoretical perspective to be discussed, chapters also include a contextual explanation of the film and list the specific scenes that will be used to guide students through. Concluding with discussion questions, students are asked to consider how the theories discussed might be translated in to their own experiences of children, childhood and practice. Not only supporting understanding of core principles and key ideas across any childhood studies degree, this book supports students throughout their university career and beyond by engaging with the journey of becoming a graduate as well as discussion of workplace issues and concepts after graduation.

Tectonic Evolution, Collision, and Seismicity of Southwest Asia Rasoul Sorkhabi, 2017-12-21 Southwest Asia is one of the most remarkable regions on Earth in terms of active faulting and folding, large magnitude earthquakes, volcanic landscapes, petroliferous foreland basins, historical civilizations as well as geologic outcrops that display the protracted and complex 540 m.y. stratigraphic record of Earth's Phanerozoic Era. Emerged from the birth and demise of the Paleo Tethys and Neo Tethys oceans, southwest Asia is currently the locus of ongoing tectonic collision between the Eurasia Arabia continental plates. The region is characterized by the high plateaus of Iran and Anatolia, fringed by the lofty ranges of Zagros, Alborz, Caucasus, Taurus and Pontic mountains. The region also includes the strategic marine domains of the Persian Gulf, Gulf of Oman, Caspian and Mediterranean. This 19 chapter volume, published in honor of Manuel Berberian, a preeminent geologist from the region, brings together a wealth of new data, analyses and frontier research on the geologic evolution, collisional tectonics, active deformation and historical and modern seismicity of key areas in southwest Asia.
