 Colwell,Amy Hutchison,Lindsay Woodward,2020 This book focuses on how elementary teachers might plan for and
 incorporate digitally supported disciplinary literacy into English Language Arts Mathematics Science and Social Studies to
 reach all learners To do so the authors present the six phase Planning Elementary Digitally Supported Literacy PEDDL
 Framework along with four core practices useful for considering elementary disciplinary literacy After grounding disciplinary
 literacy in elementary grades how it might support all learners and the rationale for its inclusion in K 5 instruction core
 practices are presented along with a rationale behind those practices Then the authors provide an in depth overview of the
 PEDDL Framework with examples and research based underpinnings of each phase Finally a paired chapter approach then
 guides readers through each of the four core disciplines to first overview practices particular to each discipline that are
 appropriate for elementary grades and then provide detailed lesson planning approaches using the PEDDL Framework for
 each Supplementary lesson plan examples are also offered in this book for extended consideration of digitally supported

PREFACE The Third International Mathematics and Science Study TIMSS sponsored by the International Association for the Evaluation of Educational Achievement IEA and the governments of the participating countries is a comparative study of education in mathematics and the sciences conducted in approximately 50 educational systems on six continents The goal of TIMSS is to measure student achievement in mathematics and science in participating countries and to assess some of the curricular and classroom factors that are related to student learning in these subjects The study is intended to provide educators and policy makers with an unparalleled and multidimensional perspective on mathematics and science curricula their implementation the nature of student performance in mathematics and science and the social economic and educational context in which these occur TIMSS focuses on student learning and achievement in mathematics and science at three different age levels or populations Population 1 is defined as all students enrolled in the two adjacent grades that contain the largest proportion of 9 year old students Population 2 is defined as all students enrolled in the two adjacent grades that contain the largest proportion of 13 year old students and Population 3 is defined as all students in their final year of secondary education including students in vocational education programs In addition Population 3 has two specialist subpopulations students taking advanced courses in mathematics mathematics specialists and students taking advanced courses in physics physics specialists

Making Standards Useful in the Classroom Robert J. Marzano, Mark W. Haystead, 2008-03-15

Has the standards movement in the United States led to improved classroom instruction and effective assessment In too many cases the answer is no As authors Robert J Marzano and Mark W Haystead explain two major reasons account for this situation state and national standards documents typically identify far more content than teachers can actually teach during a school year and the standards are not written in a manner that supports effective instruction and assessment In *Making Standards Useful in the Classroom* Marzano and Haystead present a way to convert standards documents into a format that teachers can actually use to guide instruction and to create meaningful formative assessments In Part I of this practical guide teachers administrators and curriculum specialists will find answers to questions such as these What are the steps to follow in unpacking and rewriting standards so they are useful for classroom teachers What is a measurement topic and what kind of content should it include How can measurement topics be organized into a coherent system for learning and assessment Why is averaging a flawed method for calculating grades What is the best way to assess learning and determine a grade that accurately represents students growth in knowledge and skill Part II of the book consists of scoring scales with sample measurement topics for language arts math science and social studies for kindergarten through 8th grade and sample measurement topics for life skills for kindergarten through 12th grade Using the samples as a guide districts and schools can create their own systems for translating standards into useful components of effective instruction

and formative assessment that truly drive student learning Note This product listing is for the Adobe Acrobat PDF version of the book
