Advances in Multimedia Information Processing -- PCM 2010, Part I Guoping Qiu, Kin Man Lam, Hitoshi Kiya, Xiang-Yang Xue, C.-C. Jay Kuo, Michael S. Lew, 2010-09-03 The 2010 Pacific Rim Conference on Multimedia PCM 2010 was held in Shanghai at Fudan University during September 21-24, 2010. Since its inauguration in 2000, PCM has been held in various places around the Pacific Rim: namely Sydney PCM 2000, Beijing PCM 2001, Hsinchu PCM 2002, Singapore PCM 2003, Tokyo PCM 2004, Jeju PCM 2005, Zhejiang PCM 2006, Hong Kong PCM 2007, Tainan PCM 2008, and Bangkok PCM 2009. PCM is a major annual international conference organized as a forum for the dissemination of state-of-the-art technological advances and research results in the fields of theoretical, experimental, and applied multimedia analysis and processing. PCM 2010 featured a comprehensive technical program which included 75 oral and 56 poster presentations selected from 261 submissions from Australia, Canada, China, France, Germany, Hong Kong, India, Iran, Italy, Japan, Korea, Myanmar, Norway, Singapore, Taiwan, Thailand, the UK, and the USA. Three distinguished researchers: Prof. Zhi Hua Zhou from Nanjing University, Dr. Yong Rui from Microsoft, and Dr. Tie Yan Liu from Microsoft Research Asia delivered three keynote talks to the conference. We are very grateful to the many people who helped to make this conference a success. We would like to especially thank Hong Lu for local organization, Qi Zhang for handling the publication of the proceedings, and Cheng Jin for looking after the conference website and publicity. We thank Fei Wu for organizing the special session on large-scale multimedia search in the social network settings.

The Nature of the Page Joshua Calhoun, 2020-01-24 An innovative study of books and reading that focuses on papermaking in the Renaissance. In *The Nature of the Page*, Joshua Calhoun tells the story of handmade paper in Renaissance England and beyond. For most of the history of printing, paper was made primarily from recycled rags, so this is a story about using old clothes to tell new stories about plants used to make clothes and about plants that frustrated papermakers' best attempts to replace scarce natural resources with abundant ones. Because plants like humans are susceptible to the ravages of time, it is also a story of corruption and the hope that we can preserve the things we love from decay. Combining environmental and bibliographical research with deft literary analysis, Calhoun reveals how much we have left to discover in familiar texts. He describes the transformation of plant material into a sheet of paper, details how ecological availability or scarcity influenced literary output in the sixteenth and seventeenth centuries, and examines the impact of the various colors and qualities of paper on early modern reading practices. Through a discussion of sizing—the mixture used to coat the surface of paper so that ink would not blot into its fibers—he reveals a surprising textual interaction between animals and readers. He shows how we might read an indistinct stain on the page of an early modern book to better understand the mixed-media surfaces on which readers, writers, and printers recorded and revised history. Lastly, Calhoun considers how early modern writers imagined paper decay and how modern scholars grapple with biodeterioration today. Exploring the poetic interplay between human ideas and the plant, animal, and mineral forms through which they are mediated, *The Nature of the*

Page prompts readers to reconsider the role of the natural world in everything from old books to new smartphones

Composing under the Skin Paul Craenen, 2014-04-29 A revealing study of the physical presence of the musician in musical performance. Fingers slipping over guitar strings, the tap of a bow against the body of a cello, a pianist humming along to the music. Contemporary composers often work with parasitic, non-conventional sounds such as these. Are they to be perceived as musical elements or do they shift attention to the physical effort of music making: contact between a body and an instrument? Composer Paul Craenen explores ways in which the musician's body is revealed in musical performance. He leads us from Cage, Lachenmann, Kagel and their contemporaries to a discussion of how today's generation of young composers is writing a body paradigm into composition itself. Micro-temporal physical gestures and instrumental timbre provide the key to unveiling the physical presence of both a musician and a composing body. The author's concept of intercorporeality, along with the idea of an alternating linear and non-linear relationship of the composing body to time, casts new light on the relationship between musicians, composers and music consumers.

Right Research Geoffrey Rockwell, Oliver Rossier, Chelsea Miya, 2021-04-29 The book is current and interdisciplinary, engaging with recent developments around this topic and including perspectives from sciences, arts and humanities. It will be a welcome contribution to studies of the Anthropocene as well as studies of research methods and practices. Sam Mickey, University of San Francisco. Educational institutions play an instrumental role in social and political change and are responsible for the environmental and social ethics of their institutional practices. The essays in this volume critically examine scholarly research practices in the age of the Anthropocene and ask what accountability educators and researchers have in righting their relationship to the environment. The volume further calls attention to the geographical, financial, legal and political barriers that might limit scholarly dialogue by excluding researchers from participating in traditional modes of scholarly conversation. As such, *Right Research* is a bold invitation to the academic community to rigorous self-reflection on what their research looks like, how it is conducted and how it might be developed so as to increase accessibility and sustainability and decrease carbon footprint. The volume follows a three-part structure that bridges conceptual and practical concerns: the first section challenges our assumptions about how

sustainability is defined measured and practiced the second section showcases artist researchers whose work engages with the impact of humans on our environment while the third section investigates how academic spaces can model eco conscious behaviour This timely volume responds to an increased demand for environmentally sustainable research and is outstanding not only in its interdisciplinarity but its embrace of non traditional formats spanning academic articles creative acts personal reflections and dialogues Right Research will be a valuable resource for educators and researchers interested in developing and hybridizing their scholarly communication formats in the face of the current climate crisis **The Earth's**

Hydrological Cycle L. Bengtsson,R.-M. Bonnet,M. Calisto,G. Destouni,R. Gurney,J. Johannessen,Y. Kerr,W.A. Lahoz,M. Rast,2014-05-02 This book gives a comprehensive presentation of our present understanding of the Earth s Hydrological cycle and the problems consequences and impacts that go with this topic Water is a central component in the Earth s system It is indispensable for life on Earth in its present form and influences virtually every aspect of our planet s life support system On relatively short time scales atmospheric water vapor interacts with the atmospheric circulation and is crucial in forming the Earth s climate zones Water vapor is the most powerful of the greenhouse gases and serves to enhance the tropospheric temperature The dominant part of available water on Earth resides in the oceans Parts are locked up in the land ice on Greenland and Antarctica and a smaller part is estimated to exist as groundwater If all the ice over the land and all the glaciers were to melt the sea level would rise by some 80 m In comparison the total amount of water vapor in the atmosphere is small it amounts to 25 kg m² or the equivalent of 25 mm water for each column of air Yet atmospheric water vapor is crucial for the Earth s energy balance The book gives an up to date presentation of the present knowledge Previously published in Surveys in Geophysics Volume 35 No 3 2014 **Food & Material Culture** Mark McWilliams,2014-07-01
