High Voltage Jim Motavalli, 2011-11-08 A behind the scenes look at the robustly competitive race to dominate the market for electric cars the larger than life moguls behind them and the changes that are transforming the auto industry In the 1980s it was unimaginable that the home computer would become as common and easy to use as a toaster Today plug in charging stations and smart grids seem like something still far off in the future But by 2020 the auto industry will look very different from today's field of troubled auto giants The combination of technological breakthroughs and charging networks driven by global warming and peak oil makes it clear that revolutionary change in the auto industry is happening right now In *High Voltage* Jim Motavalli captures this period of unprecedented change documenting the evolution from internal combustion engines to electric power Driven by the auto world's ambitious and sometimes outlandish personalities the book chronicles the race to dominate the market focusing on big players like Tesla and Fisker as well as a tiny start up and a battery supplier Flashing forward to the changes we'll see in the coming years *High Voltage* shows a not so distant future where we will live on a smart grid our cars fueling that is charging while we shop or sleep The ramifications of these changes will be on a grander scale than most of us ever imagined altering foreign policy reducing trade deficits and perhaps even ending global warming

Why Place Matters Wilfred M. McClay, Ted V. McAllister, 2014-02-25 Contemporary American society with its emphasis on mobility and economic progress all too often loses sight of the importance of a sense of place and community Appreciating place is essential for building the strong local communities that cultivate civic engagement public leadership and many of the other goods that contribute to a flourishing human life Do we in losing our places lose the crucial basis for healthy and resilient individual identity and for the cultivation of public virtues For one can't be a citizen without being a citizen of some place in particular one isn't a citizen of a motel And if these dangers are real and present ones are there ways that intelligent public policy can begin to address them constructively by means of reasonable and democratic innovations that are likely to attract wide public support Why

Place Matters takes these concerns seriously and its contributors seek to discover how given the American people as they are and American economic and social life as it now exists and not as those things can be imagined to be in some utopian scheme we can find means of fostering a richer and more sustaining way of life The book is an anthology of essays exploring the contemporary problems of place and placelessness in American society The book includes contributions from distinguished scholars and writers such as poet Dana Gioia former chairman of the National Endowment for the Arts geographer Yi Fu Tuan urbanist Witold Rybczynski architect Philip Bess essayists Christine Rosen and Ari Schulman philosopher Roger Scruton transportation planner Gary Toth and historians Russell Jacoby and Joseph Amato

Smart Products, Smarter Services Mary J. Cronin, 2010-08-19 We are surrounded by products that have minds of their own Computing power in the form of microcontrollers microprocessors sensors and data storage chips has become so cheap that manufacturers are building connectivity and embedded intelligence into all types of consumer goods These smart products are fundamentally changing both the competitive landscape for business and the daily lives of consumers This book analyzes the evolution of smart products to help managers understand the impact of embedded product intelligence on corporate strategy consumer value and industry competition It describes four different ecosystem strategies for designing and launching smart products the control focused Hegemon the standards focused Federator the high growth and brand focused Charismatic Leader and the disruptive industry Transformer This ecosystem model is then applied to smart products in the automotive wireless energy residential and health industries The book concludes with recommendations for successfully managing smart products and services
