

Peppered Moth Game

Objective: Simulate changes in moth population due to pollution and predation, and observe how species can change over time.

Go to: <https://askabiologist.asu.edu/peppered-moths-game/play.html> and read each section before you play the game, answer the questions as you go.

Peppered Moth

1. Where do peppered moths live? England
2. How do the moth larvae survive predators? They look like a small branch so they camouflage
3. What do the moths do during the winter? They change into cocoons
4. What color is the "typical" version of the moths? light
What color is the "carbonaria" version? black
5. How do adult moths survive predation? by hunting and flying at night and resting in the morning

Natural Selection

6. What was the industrial revolution? Factories were being build and they used coal and oil

7. What was the effect of the change in the color of the moths? The lightest color moths were the most common before the industrial revolution

8. What was the effect of the change in the color of the moths? The dark color moths were the most common after the industrial revolution

9. Why would dark moths have an advantage? They were better camouflaged than the light moths

10. What was the effect of the change in the color of the moths?

11. What was the effect of the change in the color of the moths? The dark color moths were the most common after the industrial revolution

12. What was the effect of the change in the color of the moths? The dark color moths were the most common after the industrial revolution

13. What was the effect of the change in the color of the moths? The dark color moths were the most common after the industrial revolution

14. What was the effect of the change in the color of the moths? The dark color moths were the most common after the industrial revolution

15. What was the effect of the change in the color of the moths? The dark color moths were the most common after the industrial revolution
