Practical Theology and Qualitative Research - second edition John Swinton, Harriet Mowat, 2016-10-30. Practical Theology is a growing discipline in its own right and the latest thinking in practical theology of how to use theological learning in practical situations is fully explored in this new edition of an established textbook. The authors examine methodologies of the social sciences and questions how they can enable the task of theological reflection, examine the relationship between qualitative and quantitative methods, and highlight the significance of both for the task of practical theology. They also take the reader through the actual process of developing and carrying out a research project using the author's own research as case study examples. Previous case studies include the rise in spirituality, the decline in church attendance, evidence-based medicine compared to needs-led assessments, the growth in chaplaincy, and how it is understood as separate from parish ministry. In this second edition, case studies and all bibliographies have been updated, plus a new chapter has been added.

Through a detailed look at the Chilean and Romanian dictatorships, it compares the different ways in which political regimes convey their view of the world through artistic means. It examines how artists help convey a new understanding of politics and political action during repressive regimes that are inspired by either communism or anti-communism, neoliberalism, traditionalist, conservative. This book

demonstrates how artistic renderings of life during dictatorships are similar in more than one respect and how art can help better grasp the similarities of these regimes It reveals how dictatorships use art to symbolically construct their power which artists can consolidate by lending their support or deconstruct through different forms of artistic resistance Preach the Word Myles MacBean,2019-11-11 How should we help equip the church leaders of Africa today There remains a well documented lack of theologically sound Bible centric preaching in Sub Saharan Africa The majority of sermons are preached by untrained or undertrained church leaders Following a practical theology praxis this book develops a conceptual framework for the evaluation of existing alternative approaches to grassroots preacher training It also proposes broad principles for effective preacher training and offers a practical solution The 20th century had seen the Christian church in Africa grow 36 fold to 360 million This amazing growth is arguably the largest religious change in human history in such a short period It has shifted the focus of Christianity from North to South This rapid growth is debatably considered by some missiologists and theologians to have resulted in an African church a mile wide and an inch deep That is a church of great size but lacking in spiritual depth The rapid growth has led to insufficient numbers of trained leaders being available to oversee their congregations Most leaders are unpaid Untrained or undertrained leaders have an inadequate knowledge of scripture and lack understanding of its interpretation They also lack the skills they need to communicate its truths Even so they preach up to 90% of the sermons in rural Africa Despite a tremendous hunger for training among many of those preachers traditional college based theological education cannot keep up with the demand for trained pastors and preachers in an affordable or culturally appropriate manner *Business Research Methods* Sheila Cameron,Deborah Price,2009-11-24 Organizations need research and managers have to be able to commission judge and use others research as well as conduct research themselves to inform business decisions Business Research Methods helps you understand the challenges of carrying out worthwhile research into significant issues and develop a wide range of research related professional skills Guiding you through the process of selecting carrying out and reporting on a successful research project it breaks down the research process from exploring the literature and crafting a research proposal to practical research management and addressing the transferable skills of project management and communication Business Research Methods places research firmly in the real world exploring why research is done and how to ensure that projects are meaningful for organizations Examples and case studies including examples of students projects give learners with little or no work experience a meaningful context in which to relate their own projects Online supporting resources for lecturers include an instructor s manual with additional activities and supporting handouts lecture slides and figures and tables from the text Resources for students include web links templates quizzes activities examples of practice and sample questionnaire results for students A Textbook of General Practice Second Edition Patrick White,Ann Wylie,2004-04-30 Aimed at medical students and junior doctors A Textbook of General Practice 2e incorporates the essential information that a student needs to know and

understand about general practice and being a general practitioner The learning style of the book is based on experiential and reflective principles in keeping with modern educative theory and practice It addresses changes in the curriculum and provides guidance on practical skills the theory of providing good medicine and the larger considerations of encouraging life long learning and professional development This is a relatively new approach in line with the GMCs recommendations and the MRCGP exams The new edition builds on the successful formula of the first by thoroughly reviewing and revising all content Self assessment sections have been added to all chapters and a glossary of terms is included at the end of the book Thinking discussion points have been extended and additional student quotes included
