**PHYSICAL SETTING
EARTH SCIENCE**

Thursday, January 26, 2017 — 9:15 a.m. to 12:15 p.m., only

The possession or use of any communications device is strictly prohibited when taking this examination. If you have or use any communications device, no matter how briefly, your examination will be invalidated and no score will be calculated for you.

Use your knowledge of Earth science to answer all questions in this examination. Before you begin this examination, you must be provided with the *2011 Edition Reference Tables for Physical Setting/Earth Science*. You will need these reference tables to answer some of the questions.

You are to answer all questions in all parts of this examination. You may use scrap paper to work out the answers to the questions, but be sure to record your answers on your answer sheet and in your answer booklet. A separate answer sheet for Part A and Part B–1 has been provided to you. Follow the instructions from the proctor for completing the student information on your answer sheet. Record your answers to the Part A and Part B–1 multiple-choice questions on this separate answer sheet. Record your answers for the questions in Part B–2 and Part C in your separate answer booklet. Be sure to fill in the heading on the front of your answer booklet.

All answers in your answer booklet should be written in pen, except for graphs and drawings, which should be done in pencil.

When you have completed the examination, you must sign the declaration printed on your separate answer sheet, indicating that you had no unlawful knowledge of the questions or answers prior to the examination and that you have neither given nor received assistance in answering any of the questions during the examination. Your answer sheet and answer booklet cannot be accepted if you fail to sign this declaration.

Notice ...

A four-function or scientific calculator and a copy of the *2011 Edition Reference Tables for Physical Setting/Earth Science* must be available for you to use while taking this examination.

DO NOT OPEN THIS EXAMINATION BOOKLET UNTIL THE SIGNAL IS GIVEN.

Bricks Without Straw Al Bruno Ph.D.,2021-02-24 What has happened to our youth How did it all go south so fast Hardly any of them give up a seat to an elderly person or a pregnant woman and profanity against bus drivers teachers police officers and everyone else has become a rite of passage Drug use and violence no longer strike fear in their hearts Even worse they re entitled believing everything should be theirs even if they have not worked hard for it Meanwhile parents have given up on parenting preferring to turn over their children to the government or society to be reared Al Bruno Ph D a longtime educator and former chaplain highlights the epidemics that have ravaged our youth in Bricks without Straw He offers guidance on how to take back our children guide them and teach them about the Lord prepare children for the difficult life they will face as adults teach children right from wrong instill a love of learning in children With youth crime surging a waning work ethic and children hurling insults at each other at every opportunity the stakes could not be higher Whether you re an educator parent grandparent or community leader you ll grasp the problem and find solutions in this book Earth Science and Applications from Space National Research Council,Division on Engineering and Physical Sciences,Space Studies Board,Committee on Earth Science and Applications from Space: A Community Assessment and Strategy for the Future,2007-10-01 Natural and human induced changes in Earth s interior land surface biosphere atmosphere and oceans affect all aspects of life Understanding these changes requires a range of observations acquired from land sea air and space based platforms To assist NASA NOAA and USGS in developing these tools the NRC was asked to carry out a decadal strategy survey of Earth science and applications from space that would develop the key scientific questions on which to focus Earth and environmental observations in the period 2005 2015 and beyond and present a prioritized list of space programs missions and supporting activities to address these questions This report presents a vision for the Earth science program an analysis of the existing Earth Observing System and recommendations to help restore its capabilities an assessment of and recommendations for new observations and missions for the next decade an examination of and recommendations for effective application of those observations and an analysis of how best to sustain that observation and applications system *The Water Will Come* Jeff Goodell,2017-10-24 What if Atlantis wasn t a myth but an early precursor to a new age of great flooding Across the globe scientists and civilians alike are noticing rapidly rising sea levels and higher and higher tides pushing more water directly into the places we live from our most vibrant historic cities to our last remaining traditional coastal villages With each crack in the great ice sheets of the Arctic and Antarctica and each tick upwards of Earth s thermometer we are moving closer to the brink of broad disaster By century s end hundreds of millions of people will be retreating from the world s shores as our coasts become inundated and our landscapes transformed From island nations to the world s major cities coastal regions will disappear Engineering projects to hold back the water are bold and may buy some time Yet despite international efforts and tireless research there is no permanent solution no barriers to

erect or walls to build that will protect us in the end from the drowning of the world as we know it The Water Will Come is the definitive account of the coming water why and how this will happen and what it will all mean As he travels across twelve countries and reports from the front lines acclaimed journalist Jeff Goodell employs fact science and first person on the ground journalism to show vivid scenes from what already is becoming a water world An immersive mildly gonzo and depressingly well timed book about the drenching effects of global warming and a powerful reminder that we can bury our heads in the sand about climate change for only so long before the sand itself disappears Jennifer Senior New York Times

Fire and Ice Jonathan Mingle, 2025-06-25 High in the Himalayan valley of Zaskar in northwest India sits a village as isolated as the legendary Shangri La Long fed by runoff from glaciers and lofty snowfields Kumik a settlement of thirty nine mud brick homes has survived and thrived in one of the world's most challenging settings for a thousand years But now its people confront an existential threat chronic crippling drought which leaves the village canal dry and threatens to end their ancient culture of farming and animal husbandry Fire and Ice weaves together the story of Kumik's inspiring response to this calamity with the story of black carbon Black carbon from inefficient fires the particulate residue that makes soot dark is the second largest contributor to global warming after carbon dioxide It's also a key ingredient of the air pollution that public health experts regard as humanity's greatest environmental health risk worldwide soot laden smoke from household hearth fires and outdoor sources combine to kill over seven million people around the world every year Jonathan Mingle describes the joys and struggles of daily life in the Zaskar Valley where villagers are buffeted by powerful environmental and economic forces while also tracing black carbon's dark fingerprints outward from Kumik and around the world Mingle investigates its impacts on snow ice and water from Mt Everest to California and the silent health epidemic it fuels from New York to New Delhi Combining cultural history detailed reportage climate and energy science and dramatic storytelling Fire and Ice is a profound examination of the global challenges of averting climate chaos and lifting billions out of energy poverty and water scarcity Can Kumik's people come together to reinvent fire harness what remains of their life sustaining ice and reinvigorate their traditions of solidarity in time to save themselves Can the rest of us rise to the same challenge Fire and Ice connects these questions with the work of enterprising scientists engineers entrepreneurs and activists around the world in a narrative that combines mythology reason humor persistence and hope in a race against a global clock **Climate Change**

in Human History Benjamin Lieberman, Elizabeth Gordon, 2018-01-25 Climate Change and Human History provides an up to date and concise introduction to the relationship between human beings and climate change throughout history Starting with periods hundreds of thousands of years ago and continuing up to the present day the book illustrates how natural climate variability affected early human societies and how humans are now altering climate drastically within much shorter periods of time For each major period of time the book will explain how climate change has created opportunities as well as risks and challenges for human societies The book introduces and develops several related themes including Phases of climate and

history Factors that shape climate Climate shocks and sharp climate shifts Climate and the rise and fall of civilizations Industrialization and climate science Accelerating climate change human societies and the future An ideal companion for all students of environmental history Climate Change and Human History clearly demonstrates the critical role of climate in shaping human history and of the experience of humans in both adapting to and shaping climate change Theory of Quadsitron-Energy Connectivity Lane B. Scheiber II MD, Lane B. Scheiber ScD, 2019-05-23 The luminous aether a concept known for hundreds of years is the fine essence of the universe Over the last 130 years mainstream science abandoned the knowledge such an aether existed Yet reawakening the principles of a luminous aether as the fabric of space both within our being and surrounding us reaching out in every direction to the very edges of the universe explains many unsolved mysteries The luminous aether is a vast three dimensional ocean of the tiniest and most elemental particles called quadsitrons From the fusion of quadsitrons and energy all else in the universe is constructed The dynamics of quadsitrons interacting with energy accounts for and connects all the micro and macrophenomena that fill our lives such as gravity light electrons atoms molecules and magnetism It is essential we understand and grasp the principles of this wondrous quadsitron energy connectivity in order to advance our technology forward to interstellar travel **Landfalling tropical cyclones: physical processes, forecasting and impacts** Yihong Duan, Qingqing Li, Guanghua Chen, Hui Yu, Da-Lin Zhang, Kun Zhao, 2022-12-29

Fire and Ice: Soot, Solidarity, and Survival on the Roof of the World Jonathan Mingle, 2015-03-24 A thousand years ago in a Himalayan valley the village of Kumik was founded For generations Kumik villagers survived by learning to cultivate their mountain terrain drawing from the waters of the glacier and snows above the village But now the glacier is almost gone and Kumik is dying Why As Fire and Ice reveals the culprit is black carbon the most dangerous pollutant in the world and the least understood Black carbon absorbs more heat per unit of mass in the atmosphere than greenhouse gases and contributes as much to melting the glaciers of the Himalaya as carbon dioxide It s also a major component of the household air pollution that causes 4.3 million deaths each year from respiratory and cardiovascular illnesses and 3 million more from outdoor pollutants such as industrial exhaust Black carbon threatens to overwhelm Kumik unless the village can change the way it cooks heats farms and lives In Fire and Ice Jonathan Mingle weaves a dramatic narrative of one village s inspiring efforts to adapt to a rapidly changing environment and a scientific detective tale about the impact of fire on every nation Ranging from the Tibetan Plateau to New York and Washington D C from Delhi and Kathmandu and China to northern California Fire and Ice is a heroic exploration of our race to change the fate of our planet

The Climate Demon R. Saravanan, 2021-10-21 Climate predictions and the computer models behind them play a key role in shaping public opinion and our response to the climate crisis Some people interpret these predictions

as prophecies of doom and some others dismiss them as mere speculation but the vast majority are only vaguely aware of the science behind them This book gives a balanced view of the strengths and limitations of climate modeling It covers historical developments current challenges and future trends in the field The accessible discussion of climate modeling only requires a basic knowledge of science Uncertainties in climate predictions and their implications for assessing climate risk are analyzed as are the computational challenges faced by future models The book concludes by highlighting the dangers of climate doomism while also making clear the value of predictive models and the severe and very real risks posed by anthropogenic climate change
