Neil Jenkins,Oskar Lindwall,Michael Mair,2025-03-31 This volume offers a comprehensive overview of the most pressing issues and developments in the field of ethnomethodology including ethnomethodological conversation analysis and highlights new and emerging areas for research With truly authoritative coverage of the state of the art including current debates methodological issues emerging topics for inquiry new perspectives on established topics empirical studies and resources for study The Routledge International Handbook of Ethnomethodology features lively challenging discussions by a diverse range of international practitioners that will provide readers with unrivalled scholarship on ethnomethodology and conversation analysis for years to come Sections include Contexts and New Resources Theoretical Orientations Study Approaches Lay and Professional Analysis and Areas of Application Moving past the focus on Garfinkel s discovery of the field as a domain of study in the 1950s and acknowledging how ethnomethodology has changed since then by accounting for both the phenomenologically informed and Wittgensteinian emphases in ethnomethodology this Handbook constitutes an important update on the study and complexity of the topic As such The Routledge International Handbook of Ethnomethodology will be

a valuable point of reference for students and scholars across the fields of sociology communication and science studies interaction studies language and linguistics among others

People, Technology, and Social Organization Dirk vom Lehn, Will Gibson, Natalia Ruiz-Junco, 2023-10-19 This insightful and accessible book is a response to the increasing important role that technology plays in everyday life and the urgent need for empirical studies that analyse the impact of technology on social practices The chapters in this co edited collection reveal how technology is oriented to and embedded within the social organization of action in a wide range of settings and institutions including education markets arts and culture health and social care media politics and science In their analyses the contributing authors adopt interactionist perspectives to explore how the meanings of technology emerge and are negotiated within and through action and interaction The volume comprises 14 empirical chapters from authors working in fields such as symbolic interactionism ethnomethodology conversation analysis discourse methods ethnographic enquiry video based methods and others The chapters are framed by an introduction and a concluding discussion by the co editors which draws out the key themes and issues that the individual chapters speak to and show the importance of these themes for the social sciences and for society The book is primarily aimed at researchers in the social sciences including sociology social psychology organization studies and beyond whose work is concerned with the interplay between social interaction technology and institutions

Deconstructing Ethnography Graham Button, Andy Crabtree, Mark Rouncefield, Peter Tolmie, 2015-10-15 This book aims to deconstruct ethnography to alert systems designers and other stakeholders to the issues presented by new approaches that move beyond the studies of work and work practice within the social sciences in particular anthropology and sociology The theoretical and methodological apparatus of the social sciences distort the social and cultural world as lived in and understood by ordinary members whose common sense understandings shape the actual milieu into which systems are placed and used In Deconstructing Ethnography the authors show how new calls are returning systems design to old and problematic ways of understanding the social They argue that systems design can be appropriately grounded in the social through the ordinary methods that members use to order their actions and interactions This work is written for post graduate students and researchers alike as well as design practitioners who have an interest in bringing the social to bear on design in a systematic rather than a piecemeal way This is not a how to book but instead elaborates the foundations upon which the social can be systematically built into the design of ubiquitous and interactive systems

Harold Garfinkel: Studies of Work in the Sciences Harold Garfinkel, 2022-04-25 This volume includes an unpublished manuscript and selected portions of five seminars by Harold Garfinkel the founder of ethnomethodology on the topic of practices in the natural sciences and mathematics The volume provides a coherent and sustained account of his program for the study of ordinary and specialized social actions Presenting broader theoretical and methodological initiatives as well as discussions and summaries of exemplary studies of social phenomena within and beyond the sciences this work dates to the period in the 1980s during

which the field of Science and Technology Studies was taking shape with ethnomethodological studies of scientific practice forming a major part of its development at the time. Aside from their historical importance, the manuscript and seminars present a distinctive perspective on the natural and social sciences that remains highly original and pertinent to research on science, social science, and everyday life today. Offering critical insights and proposals relating to developments in Ethnomethodology and Conversation Analysis, this volume will appeal to scholars of Sociology and Science and Technology Studies with interests in the work of Garfinkel. Ethnomethodology, Conversation Analysis and Constructive Analysis Graham Button, Michael Lynch, Wes Sharrock, 2022-09-23. This book revisits the arguments by which Harvey Sacks and Harold Garfinkel opposed the widespread attempt in the social sciences to construct disciplinary theories and methods in place of common sense knowledge of human action and proposed instead an alternative that would investigate the organised methods of natural language use and common sense reasoning that constitute social orders. Arguments that led to the establishment and proliferation of ethnomethodology and conversation analysis. As the very constructive analysis that they opposed has begun to be incorporated into influential lines of research in ethnomethodology and conversation analysis, the authors return to the founding insights of the field and reiterate the importance of Garfinkel and Sacks' original and controversial proposals for an alternate sociology of practical action and practical reasoning. Showing how constructive analysis has become entrenched in ethnomethodology and conversation analysis and arguing for a need to reboot these approaches, this volume constitutes a call for a renewal of the radical alternative proposed by Garfinkel and Sacks.

Ethnomethodology at Work Peter Tolmie, 2016-04-22. Bringing together one of the most important bodies of research into people's working practices, this volume outlines the specific character of the ethnomethodological approach to work, providing an introduction to the key conceptual resources ethnomethodology has drawn upon in its studies and a set of substantive chapters that examine how people work from a foundational perspective. With contributions from leading experts in the field including Graham Button, John Hughes, and Wes Sharrock, *Ethnomethodology at Work* explores the contribution that ethnomethodological studies continue to make to our understanding of the ways in which people actually accomplish work from day to day. As such, it will appeal not only to those working in the areas of ethnomethodology and conversation analysis but also to those with interests in the sociology of work and organisations.

An Invitation to Ethnomethodology David Francis, Stephen Hester, 2004-06-02 This book offers a new and rigorous approach to observational sociology that is grounded in ethnomethodology and conversation analysis. Throughout, the authors encourage the reader to explore the social world at first hand, beginning with the immediate family context and then moving out into the public realm and organizational life. Examples of observational analysis are given with reference to topic areas such as family life, education, medicine, crime and deviance, and the reader is shown how to conduct their own inquiries using methods and materials that are readily and ordinarily available. Drawing on both original material and published studies, Francis and Hester demonstrate how observational sociology can be carried out with an attention to detail typically overlooked by more traditional ethnographic approaches.

Ethnographies of Reason Eric Livingston, 2017-05-15 Written by one of the most eminent scholars in the field, *Ethnographies of Reason* is a unique book in terms of the studies it presents, the perspective it develops, and the research techniques it illustrates. Using concrete case study materials throughout, Eric Livingston offers a fundamentally different ethnographic approach to the study of skill and reasoning. At the same time, he addresses a much neglected topic in the literature, illustrating practical techniques of ethnomethodological research and showing how such studies are actually conducted. The book is a major contribution to ethnomethodology, to social science methodology, and to the study of skill and reasoning more generally.

Designing Collaborative Systems Andy Crabtree, 2006-05-11 An invaluable introduction to the new ethnographic approach to designing effective and user-friendly collaborative and interactive systems. Here, designers are shown how to analyse the social circumstances in which a particular system will be used. Consisting of four sections, the book covers the requirements problem, how to describe and analyse cooperative work, the design process, and how to evaluate systems supporting cooperative work. Practical examples are provided throughout, based on the development case of a collaborative library database system.

Methods in Language and Social Interaction, 2008 *Routledge Revivals: Ethnomethodological Studies of Work (1986)* Harold Garfinkel, 2017-10-16 First published in 1986, this collection of essays brings together ethnomethodological studies from key academics of the discipline, including the renowned scholar Harold Garfinkel, who established and developed the field. In addition to four case studies, the volume begins and ends with two essays which discuss some of the theory employed by ethnomethodologists. The essays in this collection look at a range of areas, from truck wheel accidents and their regulation to martial arts and alchemy, and provide concise and insightful examples of the ways in which ethnomethodology can be applied to a number of settings and subjects. This work will be of interest to those studying ethnomethodology and sociology.
