Riding the Indian Tiger William Nobrega, Ashish Sinha, 2008-04-11 In 2008 India will likely overtake China as the world's fastest growing economy and become one of the largest economies globally. Foreign investment is increasing dramatically and business opportunities abound for those who know how to find them. With a growing middle class and booming markets, India holds much promise for investors. **Riding the Indian Tiger** shows you how to get in on the ground floor and profit from India's economic boom.

11th International Symposium on Process Systems Engineering - PSE2012 Iftekhar A. Karimi, Rajagopalan Srinivasan, 2012-09-09 While the PSE community continues its focus on understanding, synthesizing, modeling, designing, simulating, analyzing, diagnosing, operating, controlling, managing, and optimizing a host of chemical and related industries using the systems approach, the boundaries of PSE research have expanded considerably over the years. While early PSE research was largely concerned with individual units and plants, the current research spans wide ranges of scales in size: molecules to processing units to plants to global multinational enterprises to global supply chain networks, biological cells to ecological webs, and time: instantaneous molecular interactions to months of plant operation to years of strategic planning. The changes and challenges brought about by increasing globalization and the common global issues of energy sustainability and environment provide the motivation for the theme of PSE2012: Process Systems Engineering and Decision Support for the Flat World. Each theme includes an invited chapter based on the plenary presentation by an eminent academic or industrial researcher. Reports on the state of the art advances in the various fields of process systems engineering. Addresses common global problems and the research being done to solve them.

Army Science and Technology for Homeland Security National Research Council, Division on Engineering and Physical Sciences, Board on Army Science and Technology, Committee on Army Science and Technology for Homeland Defense -- C4ISR, 2004-08-03 Shortly after the events of September 11, 2001, the U.S. Army asked the National Research Council (NRC) for a series of reports on how science and technology could assist the Army meet its homeland defense obligations. The first report, *Science and Technology for Army Homeland Security Report 1*, presented a survey of a wide range of technologies and recommended applying Future Force technologies to homeland security wherever possible. In particular, the report noted that the Army should play a major role in providing emergency command and control, communications, computers, intelligence, surveillance, and reconnaissance (C4ISR) capabilities and that the technology and architecture needed for homeland security C4ISR was compatible with that of the Army's Future Force. This second report focuses on C4ISR and how it can facilitate the Army's efforts to assist the Department of Homeland Security (DHS) and emergency responders meet a catastrophic event.
