

Mounting Bracket

Attach the mounting bracket to the right side of the handlebar by using a screwdriver as shown in Fig. 5. Use the rubber shims as shown in Fig. 6 to ensure that the bracket is secure. Adjust the position of the bracket as shown in Fig. 6 to desired angle. Tighten screws to secure bracket.

Computer

The computer attaches to the mounting shoe by sliding the unit until it snaps firmly into position. Fig. 7.

Important: To remove computer from mounting shoe, wrap forefinger around the front of the mounting shoe, press the release button and push the computer forward with your thumb.

Sensor Wiring

Route the sensor wire up the fork blade, using cable ties to secure it at the bottom and top. Wire must not hang loosely, but must have enough slack to allow the front wheel and handle bars to turn without putting too much tension on the sensor wire. Too much tension could loosen the wire from the computer and interrupt input to the computer.

However, be certain that there is not too much slack and that the wire does not interfere with free movement or spinning of the front wheel. Route the remaining wire around the front brake cable and the handlebar. Excess wire should be carefully looped and secured to the stem with a cable tie.
