Designing and Teaching the Secondary Science Methods Course Aaron J. Sickel, Stephen B. Witzig, 2017-04-13 The improvement of science education is a common goal worldwide. Countries not only seek to increase the number of individuals pursuing careers in science but to improve scientific literacy among the general population. As the teacher is one of the greatest influences on student learning, a focus on the preparation of science teachers is essential in achieving these outcomes. A critical component of science teacher education is the methods course where pedagogy and content coalesce. It is here that future science teachers begin to focus simultaneously on the knowledge, dispositions, and skills for teaching secondary science in meaningful and effective ways. This book provides a comparison of secondary science methods courses from teacher education programs all over the world. Each chapter provides detailed descriptions of the national context, course design, teaching strategies, and assessments used within a particular science methods course and is written by teacher educators who actively research science teacher education. The final chapter provides a synthesis of common themes and unique features across contexts and offers directions for future research on science methods courses. This book offers a unique combination of behind-the-scenes thinking for secondary science methods course designs along with practical teaching and assessment strategies and will be a useful resource for teacher educators in a variety of international contexts.

The 5Es of Inquiry-Based Science Chitman-Booker, Lakeena, 2017-03-01 Create an active learning environment in grades K-12 using the 5E inquiry-based science model. Featuring a practical guide to implementing the 5E model of instruction, this resource clearly explains each E in the 5E model of inquiry-based science. It provides teachers with practical strategies for stimulating inquiry with students and includes lesson ideas. Suggestions are provided for encouraging students to investigate and advance their understanding of science topics in meaningful and engaging ways. This resource supports core concepts of STEM instruction.

A Practical Approach to Supporting Science and Engineering Students with Self-Regulated Learning Erin E. Peters-Burton, 2023-11-16 Science and engineering practices tend to be more difficult to teach and monitor for student progress than content knowledge because practices are skill-based. This book presents tangible ways for teacher educators and teachers to design learning environments that involve student goal setting, monitoring, and reflection on their performance of science and engineering practices. It models ways teachers can support effective learning behaviors and monitor student progress in science and engineering practices. It also presents practical ways to set up preservice teacher instruction and inservice teacher professional development that address both self-regulated learning and science and engineering practices. Educational research designs are presented from qualitative, quantitative, and mixed methods traditions that investigate student and teacher engagement with science and engineering practices through self-regulated learning.

Your Science Classroom M. Jenice Goldston, Laura Downey, 2012-01-18 *Your Science Classroom: Becoming an Elementary/Middle School Science Teacher* by authors M. Jenice Dee Goldston and Laura Downey is a core teaching methods

textbook for use in elementary and middle school science methods courses Designed around a practical practice what you teach approach to methods instruction the text is based on current constructivist philosophy organized around 5E inquiry and guided by the National Science Education Teaching Standards **Strategies for Writing in the Science Classroom** Kathleen Kopp,2011 Writing is a valuable learning tool that can quite effectively and easily help students learn and understand science content Teaching it however can be challenging for content area teachers now under pressure from the Common Core Standards refocused attention on reading and writing With step by step directions rubrics student examples templates technology tips and ideas for differentiation Kopp goes beyond journals or reports to show how science teachers can use writing to develop critical thinking skills improve understanding of scientific concepts assess students progress and hone skills in content area writing Her writing strategies support the Common Core Standards and because the focus is on applying writing skills and not teaching writing as an end in itself science teachers can easily incorporate these strategies in any unit of study This comprehensive resource makes it easy to incorporate writing in your science class today and every day
