Looking Back, Ahead B. Joerges, H. Nowotny, 2012-12-06 BERNWARD JOERGES AND HELGA NOWOTNY YET ANOTHER TURN The thing that doesn't fit is the thing that's most interesting Richard Feynman This volume was originally conceived as a contribution to yet another turn not captured by one of the many adjectives that have served to describe the collective meandering of the scholarly community in search of direction It was meant to mark the millennial turn a seemingly purely chronological event but one in search for great meanings and invested with loaded significances The editors wanted to seize the opportunity of the moment in order to pause and reflect on the sociology and history of social studies of science and technology The moment came and went and the new millennium barely nine months later thrust its historical marker upon the world through a horrendous and cruel shock in an unforeseen and unforeseeable way Since then the world appears more vulnerable and volatile fragmented and fraught with uncertainty The universal values as bequeathed by the Enlightenment are either refused or appear refuted The dream of a universal civilization which has accompanied the unfolding of the

existing multiple modernities in their historically unique trajectories has been discarded and its promises in tatters

"Science of Logic" Stanley Rosen, 2024-05-31 Although Hegel considered Science of Logic essential to his philosophy it has received scant commentary compared with the other three books he published in his lifetime Here philosopher Stanley Rosen rescues the Science of Logic from obscurity arguing that its neglect is responsible for contemporary philosophy's fracture into many different and opposed schools of thought Through deep and careful analysis Rosen sheds new light on the precise problems that animate Hegel's overlooked book and their tremendous significance to philosophical conceptions of logic and reason Rosen's overarching question is how if at all rationalism can overcome the split between monism and dualism Monism which claims a singular essence for all things ultimately leads to nihilism while dualism which claims multiple irreducible essences leads to what Rosen calls the endless chatter of the history of philosophy The Science of Logic he argues is the fundamental text to offer a new conception of rationalism that might overcome this philosophical split Leading readers through Hegel's book from beginning to end Rosen's argument culminates in a masterful chapter on the Idea in Hegel By fully appreciating the Science of Logic and situating it properly within Hegel's oeuvre Rosen in turn provides new tools for wrangling with the conceptual puzzles that have brought so many other philosophers to disaster
