

How Car Engines Work

How does a car engine work? When you turn the key, the engine starts. In a gasoline-powered engine, the engine burns a mixture of gasoline and air. This kind of engine is called an **internal combustion engine**. Every minute, hundreds of small blasts happen inside. The blasts create energy. The energy causes the inside of the engine to **rotate**, which makes the car move.

Internal combustion engines need gas to make them go. ➔

Gas Me Up!

Gas is the shortened name for **gasoline**. Gas is made from **petroleum** (guh-PEE-troh-le-oh-ee-um), or the British call it petrol.

Internal combustion engines. ➔
