Federal Register, 2013-02 [Eight Propositions](#) Joe L. Rempson, 2020-11-19 Rempson takes issue with those who lay the plight of African Americans on racism not seeing it today as a major obstacle to black progress Rather he traces the origin back to what he terms the African American Garden of Eden In it W E B Dubois outlasted Booker T Washington and fathered a tradition which Rempson argues has produced a victim identity and an emphasis on the system rather than the self Only black males offer a way out he declares because it is entirely our black males who are keeping us down and curtailing our progress in contrast to black females who are doing OK They are plagued by what Rempson calls the African American Male School Adaptability Crisis AMSAC Their academic performance ranks at the bottom alone below black female students and below white Asian and Hispanic male students In large urban areas their high school dropout rate is 59 percent and nationally they lag behind in college attendance and graduation rates The

outcome Rempson argues is dysfunctionality and the existence of hedonistic norms which hinder family and community stability But while black males are the problem Rempson contends it is nevertheless only they who can solve it because research and experience show that it takes males to bring up and change other males Though intended for everyone he therefore writes his book to his fellow advantaged black males and makes a passionate plea for them to step up and with the help of black females and of the nation take the lead As their guide he has formulated eight propositions Arrived at through an examination of impressively extensive data from numerous sources and disciplines they are a marked departure from the customary Most strikingly delicate matters such as those which pertain to intelligence quotient IQ and culture are openly confronted and dealt with But Rempson writes unless confronted we will not solve our problems Nor he continues can we solve them unless we cut the umbilical cord to white America We have no right to expect it to be our savior nor are we justified in perceiving it as our oppressor Forcefully and finely written Rempson s book is a singular and courageous contribution Alone his eight propositions make it a worthy read

Corporate Control Nora Loreto, 2025-05-06

How deep does corporate dominance go in Canada The second book in Nora Loreto s landmark series dives into the corporate web spun around Canada s economy society and politics The joke goes that Canada is three mining companies in a trench coat Or three oil companies in a trench coat Or three telecom companies in a trench coat It s funny because it s almost true a handful of corporations exert a disproportionate amount of power over Canadian democracy Corporate profits are at a record high and the divide between the rich and the poor has never been wider Canadians are struggling with affordability the housing crisis and wages that don t cover basic needs The combination of these forces is a pressure cooker that politicians have promised to tackle except they can t they are too restricted by corporate power to confront the roots of the problems Canadians face The first book in the Canada in Decline series examines the rise and fall of Canada s social safety net In this next volume Loreto goes further identifying why Canadian politicians seem impotent in the face of corporate Canada

Atlas of Religion in China: Social and Geographical Contexts Fenggang Yang, 2018-09-04 The speed and the scale with which traditional religions in China have been revived and new spiritual movements have emerged in recent decades make it difficult for scholars to stay up to date on the religious transformations within Chinese society This unique atlas presents a bird s eye view of the religious landscape in China today In more than 150 full color maps and six different case studies it maps the officially registered venues of China s major religions Buddhism Christianity Protestant and Catholic Daoism and Islam at the national provincial and county levels The atlas also outlines the contours of Confucianism folk religion and the Mao cult Further it describes the main organizations beliefs and rituals of China s main religions as well as the social and demographic characteristics of their respective believers Putting multiple religions side by side in their contexts this atlas deploys the latest qualitative quantitative and spatial data acquired from censuses surveys and fieldwork to offer a definitive overview of religion in contemporary China An essential resource for all scholars and students of religion and society in

Technology, Media Literacy, and the Human Subject Richard S. Lewis, 2021-06-03 Media literacy is often focused on evaluating the message rather than reflecting on the medium Bringing together postphenomenology media ecology posthumanism and complexity theory Richard Lewis s book offers a method for such a reflection and shows how our everyday media environments constitute us as post human subjects one that is becoming and constitutes through relations also with our media technologies An original interdisciplinary effort including for example the term intrasubjective mediation and a must read book for everyone interested in how we become with and through technologies Prof Mark Coeckelbergh University of Vienna Technology Media Literacy and the Human Subject is a clearly and concisely written book that employs a fruitful transdisciplinary approach It at once offers an excellent grounding in the literature whilst simultaneously developing a useful tool for students to reflect deeply and critically upon their own engagement with media Thoroughly recommended Alexander Thomas University of East London What does it mean to be media literate in today s world How are we transformed by the many media infrastructures around us We are immersed in a world mediated by information and communication technologies ICTs From hardware like smartphones smartwatches and home assistants to software like Facebook Instagram Twitter and Snapchat our lives have become a complex interconnected network of relations Scholarship on media literacy has tended to focus on developing the skills to access analyze evaluate and create media messages without considering or weighing the impact of the technological medium how it enables and constrains both messages and media users Additionally there is often little attention paid to the broader context of interrelations which affect our engagement with media technologies This book

addresses these issues by providing a transdisciplinary method that allows for both practical and theoretical analyses of media investigations Informed by postphenomenology media ecology philosophical posthumanism and complexity theory the author proposes both a framework and a pragmatic instrument for understanding the multiplicity of relations that all contribute to how we affect and are affected by our relations with media technology The author argues persuasively that the increased awareness provided by this posthuman approach affords us a greater chance for reclaiming some of our agency and provides a sound foundation upon which we can then judge our media relations This book will be an indispensable tool for educators in media literacy and media studies as well as academics in philosophy of technology media and communication studies and the post humanities *Quantum Mechanical Initial Conditions and Gravity (Copenhagen's Illusions)* Pavel Simeonev Kamenov, 2006 Since the late 1920s the theory formulated by Niels Bohr and his colleagues at Copenhagen has been the dominant interpretation of quantum mechanics Yet an alternative interpretation rooted in the work of Luis de Broglie and reformulated and extended by David Bohm and his colleagues in the 1950s explains the experimental data equally well Through a detailed historical and sociological study of debates within and between opposing camps and the reception given each theory Cushing showed that despite the pre eminence of the Copenhagen view the Bohms interpretation cannot be ignored Copenhagen interpretation became widely accepted not because it is a better explanation how of atomic phenomena than Bohms but because it happened to appear first In this monograph the author shows that Bohm s point of view is more productive The properties of solitary objects which he discusses contradict the Copenhagen s Illusions but the results are or proved or provable experimentally Cyber Dragon Dean Cheng, 2016-11-14 This book provides a framework for assessing China s extensive cyber espionage efforts and multi decade modernization of its military not only identifying the what but also addressing the why behind China s focus on establishing information dominance as a key component of its military efforts China combines financial firepower currently the world s second largest economy with a clear intent of fielding a modern military capable of competing not only in the physical environments of land sea air and outer space but especially in the electromagnetic and cyber domains This book makes extensive use of Chinese language sources to provide policy relevant insight into how the Chinese view the evolving relationship between information and future warfare as well as issues such as computer network warfare and electronic warfare Written by an expert on Chinese military and security developments this work taps materials the Chinese military uses to educate its own officers to explain the bigger picture thinking that motivates Chinese cyber warfare Readers will be able to place the key role of Chinese cyber operations in the overall context of how the Chinese military thinks future wars will be fought and grasp how Chinese computer network operations including various hacking incidents are part of a larger different approach to warfare The book s explanations of how the Chinese view information s growing role in warfare will benefit U S policymakers while students in cyber security and Chinese studies will better understand how cyber and information threats work and the seriousness of the threat posed

by China specifically **Sleeping Dogs** Andrew McDougall, 2023-08-31 What happened to the Quebec sovereignty movement after 1995 In *Sleeping Dogs* Andrew McDougall reveals how a change in federalist strategy combined with an improving political context helped Canada stabilize its federal system and bury the Quebec question for the foreseeable future The book identifies five potential reasons the Quebec sovereignty movement lost momentum and argues that all contributed to a political environment that benefited federalists McDougall explores topics of elite accommodation generational change changing identity politics economic globalization and constitutional fatigue He argues that Canada's federalist political elites have capitalized on these developments to stabilize the country by dropping the national question even when they might still hold very different visions of the Constitution Building on constitutional abeyance theory the author conceives of this strategic change as the restoration of a constitutional abeyance among federalist actors Considering recent history in light of subsequent developments *Sleeping Dogs* is a timely and important attempt to understand the evolving situation in Quebec and Canadian federalism
