

Instructions for Sentinel® Brake Control

Electronic Brake Control For 2, 4, 6 and 8 brake applications

READ THIS FIRST:

Read and follow all instructions carefully before installing or operating the brake control. Keep these instructions with the brake control for future reference.

Components of the Brake Control

- A. Power Knob
- B. Manual Slide Knob
- C. Bracket Mounting Holes
- D. Bi-Colored Level Indicator Light
- E. Level Knob
- F. Red Power Display Light
- G. Green Diagnostic Light

Important Facts to Remember

- Do not mount or activate RF generating items (cell phones, two way radios) near (less than 12") the brake control.
- CAUTION:** Reversing the connection to a breakaway battery on the trailer will destroy the brake control.
- CAUTION:** Disconnect trailer plug from the tow vehicle prior to testing a breakaway switch, or you may destroy the Brake Control.
- WARNING:** The level adjustment is CRITICAL. The level adjustment determines whether automatic braking response is delayed or aggressive.
- This brake control is activated by inertia. It senses deceleration and generates an output that reflects the inertia sensed. In a stationary state, the brake control will not apply the trailer brakes unless the Manual Slide Knob is actuated.
- WARNING:** The Gross Combined Weight Rating (GCWR) must never exceed the vehicle manufacturer's recommendation.
- CAUTION:** This control is not designed for use with electric-hydraulic trailer brake systems.
- For Technical Assistance and Warranty Information call: 1-888-785-5832 or www.tekonsha.com.

Installation Guide

WARNING: The Brake Control must be mounted from 20 degrees to 90 degrees nose up. Failure to install brake control within these constraints may cause your control to become inoperable.

Traditional Bracket Mount

- A. Mounting Bracket
- B. 1/8" x 3/8" Screws

- CAUTION:** Drilling or use of longer screws may damage unit.
- Securely mount bracket to a solid surface.
- Insert supplied 1/8" x 3/8" screws on each side into the mounting holes.
- Adjust control to desired position and tighten screws until snug.

Before Wiring the Brake Control

An optional blinking GREEN Diagnostic Light versus a constant GREEN light to monitor positive trailer connection is a set up option. This option was made available for people who may have difficulty distinguishing between red and green lights. To activate this option:

- Engage manual slide knob and hold.
 - Connect power to the brake control.
- The GREEN diagnostic light will now blink at a rate of once every eight (8) seconds when the trailer is connected. Troubleshooting diagnostics will also cause this light to blink at a much faster rate - refer to Troubleshooting Chart.

NOTE:

- Front of the Sentinel must be horizontal, see below.
- The Sentinel must be parallel to direction of travel, see below.

Leveling the Sensor

After the brake control has been securely mounted the level adjustment must be set.

NOTE:

- WARNING:** This brake control is activated by inertia and requires the level to be set properly, or the braking response will be too harsh or ineffective.
- To properly level the sensor, the tow vehicle must be parked on a level surface, it is not necessary to connect a trailer to level sensor.
- Due to the fine tuning ability of the inertia level adjustment, the level knob can be turned up to ten complete rotations from stop to stop.
- Set power knob to maximum by fully rotating upward until three bars show on knob.
- Depress tow vehicle's brake pedal and hold.
- Rotate the Level Knob counter-clockwise until the Bi-Colored Level Indicator Light starts to change colors from RED to GREEN.
- Slowly rotate the Level Knob clockwise until RED color just shows, and then carefully turn the Level Knob back counter-clockwise until the solid GREEN color is just visible.
- Once the brake control has been leveled such that the Bi-Colored Level Indicator Light shows GREEN, release the foot pedal.

NOTE:

When the brake control is leveled properly there will be very little current flowing through the brake magnets in a static state with the foot pedal depressed. The brake magnets will hum when there is current flowing through them. Anytime the Bi-Colored Light shows any color other than GREEN, there is current flowing through the brake magnets.

Adjusting the Power to the Trailer Brakes

Once the control has been installed and properly leveled, it is necessary to set the power needed to stop the trailer during a braking event.

- Connect trailer to tow vehicle.
