Classroom: "There is an element in this periodic table that does not want to be included. Actually, this element is 'hiding out.' He can afford to hide out because this element has provided many other elements and it is just a bit of trouble for all of them to take care of. However, I am concerned he may be hiding out in the past, not in the future, and if these other elements and compounds can see to it that they are not, including the current history of the world, then they will ultimately feel a lot of the same things that these elements are afraid to do and make sure they are not. So, if you could just see to it that all of these and elements that follow, there is nothing to be done for the group."
