Teams learn to use the nine phases in the interprofessional process to challenge current disciplinary paradigms and biases to create an integrated approach to patient care, healthcare delivery or population health. Drs. Penelope Moyers and Patricia Finch Guthrie focus on developing and fostering collaboration between academic institutions and healthcare organizations so that students and faculty participate on interprofessional teams with mentors and staff from a healthcare organization. Interprofessional Evidence Based Practice: A Workbook for Health Professionals also addresses the communication and cross-organizational factors important for supporting the work of the team. Common team and mentoring issues encountered in EBP are clearly articulated along with the iterative problem-solving approaches necessary to mitigate temporary stumbling blocks. The book provides detail for developing and launching an Interprofessional Evidence Based Practice program that goes beyond the evidence process to include implementation science to support practice change. Approaches for developing partnerships for supporting this type of program between universities and healthcare institutions are contained within, including sample partnership agreements and resource sharing strategies. Inside Interprofessional Evidence Based Practice: A Workbook for Health Professionals, each chapter includes performance objectives, key words, checklists, and materials and resources that an interprofessional team can use. PowerPoint lectures, mentor newsletters, forms, tools, and other resources are included on a companion website to guide team learning about key EBP topics as well as to support the program coordinators and team mentors in their work with the interprofessional teams.
