

FORENSIC 4 | QUESTIONED DOCUMENT EXAMINATION

LESSON 4

Forgery- is a purposeful attempt to make a fraudulent copy of something, whether it is a signature, money or a piece of art.

Fraudulent- the origin is not what it is presented to be.

- Documents that have been established as not genuine and that actual fraud has been determined.
- Legally, forgery requires the element of intent to defraud.
- Not all non-authentic signatures are signed with the intent to defraud.

History of Forgery

The crime of forgery has been practiced since ancient times where writing existed. The following are important events in the history of forgery:

- 80 BC- Romans prohibited the falsification of documents that transferred land to heirs.
- 1726- False endorsement on an unsealed private document became a crime punishable by pillory, fines, imprisonment and even death.
- 1823- The United States enacted the principal federal forgery statute that prohibited false making, forgery or alteration of any writing for the purpose of obtaining financial gain.
- 1962- The American Law Institute's Model Penal Code simplified and defined the elements of forgery and became the standard for defining the crime forgery. 3

Indication of Genuineness

- To identify a signature as genuine or imitation, known genuine signatures of the person whose signature is in question is needed.
- To identify an unknown writer, the examiner needs known writing sample of suspects.
- These known samples establish a writer's unique identifying characteristics and variations. These are called exemplars/ standards.

School Of Forensic Document Examination:

Forensic Document Examination for Legal Professionals Michael Wakshull, 2019 Forensic document examination performed correctly is a reliable discipline that can demonstrate the innocence of your client or the guilt of your opponent. Used strategically it can help you settle out of court. When court is necessary your document examiner may be able to change their opinions. To achieve this your document examiner must be proficient in the latest techniques and adept at reporting results. Knowing the techniques and strategies behind this discipline is crucial to selecting a proficient examiner. This book is an in depth guide to help attorneys and legal professionals avoid common pitfalls in using forensic document examination. It dispels misunderstandings about the work performed by an examiner and their conclusions. You will learn the types of cases document examiners investigate how you can partner with an examiner to develop your case and what deliverables to expect.

Forensic Document Examination Jane Lewis, 2014-01-31 Forensic Document Examination enlightens forensic document examiners, forensic investigators, attorneys and others using the services of forensic document examiners with the basic principles and current trends in the area. Standards and methodologies apply now which were non-existent 20 years ago. Instrumentation has moved beyond the microscope and the magnifying glass to digital cameras, digital microscopes, video spectral comparators, electrostatic detection devices for the development of indented writing on paper, scanners and software programs like Write On 2.0 and Photoshop. Covers basic principles and methodologies used in forensic document examination. Contains state of the art techniques and new trends. Includes research over the last ten years and describes the future direction of forensic document examination.

Line by Line Michael Wakshull, 2013-01 Forensic document examination performed correctly is a reliable discipline that can demonstrate the innocence of your client or the guilt of your opponent. Handwriting Features Guide Nicole Crown, Raymond Marquis, Carolyn Bird, 2024-06-14 Forensic handwriting examination follows a process comprised of four main steps: Analysis, Comparison, Evaluation and Verification (ACE-V). While the process itself has been described and refined, very little effort has been undertaken to establish a clear and detailed list of features that the forensic handwriting examiner (FHE) must analyse in the first step of the examination. In depth analysis of graphical features of handwritten texts or signatures is integral to the work of FHEs when requested to give an expert opinion, typically to determine whether a questioned handwritten item has been written by a

specific writer Indeed it is these graphical features that will be compared between questioned and known samples to establish similarities and differences that will finally be evaluated under two or more mutually exclusive propositions to reach a conclusion A robust analysis based on clearly defined features is necessary to provide reliable and unbiased opinions Numerous books and articles describe handwriting features that should be observed during the analysis stage of the examination However the descriptions can be vague and several authors may use different terms to describe the same feature It may also happen that the same term is used to define different characteristics Moreover illustrations of terms are often scarce and some times of little help to understand what the corresponding features are These problems are exacerbated when trying to equate terms in different languages This project presents a comprehensive depiction of writing features particularly found in Latin script relating to the whole hand written text or signature which the authors consider relevant to help answer questions commonly addressed by FHEs It is the authors hope that the FHE community utilises this illustrated list of writing features which we believe can promote a thorough and complete analysis and provide a common language for FHEs Thus this project seeks to contribute to establishing a systematic and standardized approach to forensic handwriting examination and move the discipline towards reproducibility and validation
