

Two-Way Speaker Selector Switch

OWNER'S MANUAL — Please read before using this equipment.

Your RadioShack Two-Way Speaker Selector Switch is designed with non-shorting contacts to connect two pairs of stereo speaker systems. The switch lets you select one or both connected speaker systems, without overloading the transistor output stages.

Caution: This speaker selector switch is limited to a maximum of 10 watts/channel, continuous music power.

SELECTING A MOUNTING LOCATION

Select a location that is:

- within reach of the speaker wires
- convenient for switch operation
- suitable for mounting the selector switch using the supplied machine screws.

MOUNTING

Position the speaker selector switch on the selected mounting location, then screw the four supplied machine screws into the selector's screw holes to secure it in place.

CONNECTIONS

You can connect the speaker selector switch between an amplifier's speaker output terminals and the speaker input terminals.

Note: Your local RadioShack store sells the necessary speaker wire.

To connect speaker wire to a speaker selector switch terminal, wrap the stripped end of

the wire around the terminal's screw stem (under the washer).

Caution: When using stranded wires, twist them so all strands contact only the appropriate terminals. If loose strands touch nearby terminals, the system might not operate properly.

Use a screwdriver to loosen and tighten the four **AMP** and eight **SPK A** and **SPK B** terminal screws.

Caution: Be sure to follow proper polarity (– to – and + to +) when making connections.

1. Connect the amplifier's left speaker output terminals to the **AMP L** (left) negative (–) and positive (+) terminals and tighten its screws.
2. Connect the amplifier's right speaker output terminals to the **AMP R** (right) negative (–) and positive (+) terminals and tighten its screws.
3. Connect the first speaker system's left and right negative (–) and positive (+) terminals to the corresponding **SPK A R** and **L** terminals on the speaker selector switch and tighten its screws.
4. Connect the second speaker system's left and right negative (–) and positive (+) terminals to the corresponding **SPK B R** and **L** terminals on the speaker selector switch and tighten its screws.
