Introducing TEHMA

In order to achieve true "hold button" activation, we created a small module called a TEHMA (telephone extension hold music activator). This line-powered activator connects between the base of your phone and the handset cord and sends a signal down the phone line telling the MOH 500e unit whether or not the phone is on-hold. Only phone extensions with a TEHMA can put a call on-hold with the phone's hold button.

Phones without a TEHMA can put a call on-hold by pressing the star key twice and then pressing the phone's hold button.

The MOH 500e ships with 2 TEHMAs. Additional activators can be ordered from your reseller or from the On-Hold Plus on-line store.
