On Nest Pas Des Boeligufs:

Pascal: Reasoning and Belief Michael Moriarty, 2020-02-13 This book is a study of Blaise Pascal's defence of Christian belief in the Pensées. Michael Moriarty aims to expound and in places to criticize what he argues is a coherent and original apologetic strategy. Setting out the basic philosophical and theological presuppositions of Pascal's project, the present volume draws the distinction between convictions attained by reason and those inspired by God-given faith. It also presents Pascal's view of the contradictions within human nature between the wretchedness, our inability to live the life of reason to attain secure and durable happiness and the greatness, the power of thought manifested in the very awareness of our wretchedness. His mind/body dualism and his mechanistic conception of non-human animals are discussed. Pascal invokes the biblical story of the Fall and the doctrine of original sin as the only credible explanation of these contradictions. His analysis of human occupations as powered by the twin desire to escape from painful thoughts and to gratify one's vanity is subjected to critical examination as is his conception of the self and self-love. Pascal argues that just as Christianity propounds the only explanation for the human condition, so it offers the only kind of happiness that would satisfy our deepest longings. He thus reasons that we have an interest in investigating its truth-claims as rooted in the Bible and in history. The closing chapters of this book discuss Pascal's view of Christian morality and the famous wager argument for opting in favour of Christian belief.

Cult, Ritual, Divinity and Belief in the Roman World Duncan Fishwick, 2018-02-06 The papers assembled in this selection of studies range in subject matter from early Judaic magic to an inscribed monument of the Neo Classical period The principal emphasis of the collection is nevertheless on religious developments under the High Roman Empire problems arising from the interpretation of oriental cults imported from the Hellenistic East but primarily the development of imperial cult the one universal religion of the empire before the coming of Christianity The essays divide into five categories Divinity and Power The Imperial Numen The Imperial Cult Review and Discussion Rituals and Ceremonies Aenigmata The titles of the individual articles speak for themselves but readers may also find the preface of interest in so far as it sets out the author s ideas on the controversial nature of the emperor s divinity While this is a topic deserving of a book in its own right the preface together with the points raised by individual studies within the overall framework may go some way to repairing this deficiency

How to make

our ideas clear Charles Sanders Peirce,2022-12-27 How to make our ideas clear Whoever has looked into a modern treatise on logic of the common sort will doubtless remember the two distinctions between clear and obscure conceptions and between distinct and confused conceptions They have lain in the books now for nigh two centuries unimproved and unmodified and are generally reckoned by logicians as among the gems of their doctrine A clear idea is defined as one which is so apprehended that it will be recognized wherever it is met with and so that no other will be mistaken for it If it fails of this clearness it is said to be obscure ABOUT THE AUTHOR Charles Sanders Peirce born Sept 10 1839 Cambridge Mass U S died April 19 1914 near Milford Pa was an American scientist logician and philosopher who is noted for his work on the logic of relations and on pragmatism as a method of research **Reason and Belief in the Age of Roscelin and Abelard**

Languages of Belief and Early Sociology in Nineteenth-Century France Michiel Van Dam, 2024-09-27 This book presents a new reading of the history of French social science and religion through an investigation of early sociology's techniques for narrating the category of belief. The author argues that by looking at the history of social sciences in this manner, we gain a deeper understanding of both our present debates on post-secularity as well as our modernist past, both of which were thoroughly shaped by their reflections and critiques on the notion of belief, yet failed to enter into any sort of meaningful communication with each other. This book seeks to rectify this failure by introducing the concept of belief languages, an anthropological framework designed to historicize different discussions on belief and allow for their comparative description and analysis. **The Evidence of the Christian Religion Derived from Its Original**
