Social Computing Theory and Practice: Interdisciplinary Approaches Papadopoulou, Panagiota, Kanellis, Panagiotis, Martakos, Drakoulis, 2010-10-31 This book offers a holistic approach to social computing with respect to the underlying theory technology and mechanisms as well as the challenges opportunities and impact of social computing to any application area Provided by publisher Determinants and Impact of Early Vascular Aging in Children and Adolescents Ruan Kruger, Rachel Climie, Mieczyslaw Litwin, 2022-10-26 **Proceedings of the Focus Conference (TFC 2024)** Manyane Makua, Mariam Akinlolu, Phiwayinkosi Gumede, Mashango Sithole, Cebo Nyondo, Ntombikhona Nene, Mandlenkosi Mhlongo, 2024-12-31 This is an open access book The Teaching and Learning Development Centre TLDC at Mangosuthu University of Technology MUT invites you to the 11th Focus Conference scheduled for 14 to 16 August 2024 at Southern Sun Elangeni Hotel Durban South Africa The theme of the Conference Three Decades of Democracy reflecting on Higher Education Achievements Challenges Impact and the Future is aptly aligned with South Africa's 30 years of democracy celebration The Conference brings together leading scholars academics policymakers and practitioners in the higher education and TVET sectors to share their research and express their perspectives concerning the Conference theme and sub themes Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict *Corrupted* takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly *Higher Education in the BRICS Countries* Simon Schwartzman, Rómulo

Pinheiro,Pundy Pillay,2015-03-24 In spite of the increasing attention attributed to the rise in prominence of the BRICS Brazil Russia India China and South Africa countries few studies have looked at the ways in which broader social expectations with respect to the role of higher education across the BRICS have changed or not in recent years Our point of departure is that contrary to the conventional wisdom focusing on functionalistic perspectives higher education systems are not just designed by governments to fulfill certain functions but have a tendency for evolving in a rather unpredictable fashion as a result of the complex interplay between a number of internal and external factors In reality national higher education systems develop and change according to a complex process that encompasses the expectations of governmental agencies markets the aspirations of the population for the benefits of education the specific institutional traditions and cultures of higher education institutions and increasingly so the interests and strategies of the private firms entering and offering services in the higher education market This basically means that it is of outmost importance to move away from conceiving of universities or higher education as single monolithic actors or sector One way of doing this is by investigating a selected number of distinct but nonetheless interrelated factors or drivers which taken together help determine the nature and scope of the social compact between higher education its core actors and institutions and society at large government industry local communities professional associations

Proceedings of the 10th Focus Conference (TFC 2023) Manyane Makua,Mariam Akinlolu,Mashango
Sithole,Phiwayinkosi Gumede,Cebo Nyondo,Ntombikhona Khuzwayo,Mandlenkosi Mhlongo,2023-11-03 This is an open
access book The 2023 Focus Conference will focus on Goal Four Quality Education of the United Nations UN Sustainable
Development Goals SGD Goal Four is seized with providing equal access for all women and men to affordable and quality
technical vocational and tertiary education including university Quality education in this context means the ability to function
provide and derive value in society The theme of the conference is therefore coined as The Role of Higher Education in the
Attainment of Sustainable Quality Education Through this theme the conference will provide a space for participants to share
practical knowledge experiences and possible solutions to the myriad of problems that confront the higher education sector
Universities are often thought of as ivory towers far removed from the realities that confront global societies To compound
this higher education is increasingly being questioned for its relevance in providing practical and innovative solutions to
existing societal problems Such questions often navigate around the relevance of the academic programmes being offered
curriculum the capacity of staff employability of graduates and generally the ability of these institutions to understand why
they exist Indeed higher education s role in creating a sustainable future will presumably take on greater importance as the
world continues to become increasingly globalised and interdependent **Polyvocal Professional Learning through

university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges

The African Perspective of Sexual Orientation and Gender Identity in Higher Education Mfundo Mandla Masuku, Mbongeni Shadrack Sithole, 2025-05-23 This book uses a deconstruction context to highlight the challenges faced by the LGBTQIA communities in African Higher Education The discursive approach adopted in the book is critical in enabling the editors and their authors space to articulate the subtle problematic and context sensitive issues that drive exclusionary and unequal practices that students face in campus life The book goes on to present an advanced argument for integrating African epistemologies such as Ubuntu with social justice frameworks to foster cultural competence and diversity in higher education
