Scales in Parkinson's Disease Cristina Sampaio, Christopher G. Goetz, Anette Schrag, 2012-06-28 For many years the need to develop valid tools to evaluate signs and symptoms of Parkinson Disease PD has been present However the understanding of all intricacies of rating scales development was not widely available and the first attempts were relatively crude In 2002 the Movement Disorders Society created a task force to systemize the measurement of Parkinson's Disease Since then the Task Force has produced and published several critiques to the available rating scales addressing both motor and non motor domains of Parkinson Disease Additionally the task force initiated a project to develop a new version of the UPDRS the MDS UPDRS But none of this was made available in one convenient source Until now Rating Scales in Parkinson's Disease is written for researchers from the medical and social sciences and for health professionals wishing to evaluate the progress of their patients suffering from Parkinson Disease The book is both exhaustive in the description of the scales and informative on the advantages and limitations of each scale As such the text clearly guides readers on how to choose and use the instruments available Extensive cross referenced tables and charts closely integrate the parts of the book to facilitate readers in moving from one symptom domain to another
