Dompere, 2017-07-06 This book discusses the development of a theory of info statics as a sub theory of the general theory of information It describes the factors required to establish a definition of the concept of information that fixes the applicable boundaries of the phenomenon of information its linguistic structure and scientific applications The book establishes the definitional foundations of information and how the concepts of uncertainty data fact evidence and evidential things are sequential derivatives of information as the primary category which is a property of matter and energy The sub definitions are extended to include the concepts of possibility probability expectation anticipation surprise discounting forecasting prediction and the nature of past present future information structures It shows that the factors required to define the concept of information are those that allow differences and similarities to be established among universal objects over the ontological and epistemological spaces in terms of varieties and identities These factors are characteristic and signal dispositions on the basis of which general definitional foundations are developed to construct the general information definition GID The book then demonstrates that this definition is applicable to all types of information over the ontological and epistemological spaces It also defines the concepts of uncertainty data fact evidence and knowledge based on the GID Lastly it uses set theoretic analytics to enhance the definitional foundations and shows the value of the theory of info statics to establish varieties and categorial varieties at every point of time and thus initializes the construct of the theory of info dynamics *Teaching and Learning of Physics in Cultural Contexts* Yunebae Park, 2004 The aims of the International Conference on Physics Education in Cultural Contexts were to explore ways towards convergent and divergent physics learning beyond school boundaries improve physics education through the use of traditional and modern cultural contexts and exchange research and experience in physics education between different cultures A total of 45 papers have been selected for this volume The material is divided into three parts Context and History Conceptual Changes and Media The proceedings have been selected for coverage in OCo Index to Scientific Technical Proceedings ISTP CDROM version ISI Proceedings OCo Index to Social Sciences Humanities Proceedings ISSHP ISI Proceedings OCo Index to Social Sciences Humanities Proceedings ISSHP CDROM version ISI Proceedings OCo CC Proceedings OCo Engineering Physical Sciences *FUNDAMENTALS OF OPTICS, SECOND EDITION* SINGH, DEVRAJ, 2015-08-31 his thoroughly revised and updated text now in its second edition is primarily intended as a textbook for undergraduate students of Physics The book provides a
