Superforecasting Philip E. Tetlock, Dan Gardner, 2015-09-29 NEW YORK TIMES BESTSELLER NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE ECONOMIST The most important book on decision making since Daniel Kahneman's Thinking Fast and Slow Jason Zweig The Wall Street Journal Everyone would benefit from seeing further into the future whether buying stocks crafting policy launching a new product or simply planning the week's meals Unfortunately people tend to be terrible forecasters As Wharton professor Philip Tetlock showed in a landmark 2005 study even experts' predictions are only slightly better than chance However an important and underreported conclusion of that study was that some experts do have real foresight and Tetlock has spent the past decade trying to figure out why What makes some people so good And can this talent be taught In Superforecasting Tetlock and coauthor Dan Gardner offer a masterwork on prediction drawing on decades of research and the results of a massive government funded forecasting tournament The Good Judgment Project involves tens of thousands of ordinary people including a Brooklyn filmmaker a retired pipe installer and a former ballroom dancer who set out to forecast global events Some of the volunteers have turned out to be astonishingly good They've beaten other benchmarks competitors and prediction markets They've even beaten the collective judgment of intelligence analysts with access to classified information They are superforecasters In this groundbreaking and accessible book Tetlock and Gardner show us how we can learn from this elite group Weaving together stories of forecasting successes the raid on Osama bin Laden's compound and failures the Bay of Pigs and interviews with a range of high level decision makers from David Petraeus to Robert Rubin they show that good forecasting doesn't require powerful computers or arcane methods It involves gathering evidence from a variety of sources thinking probabilistically working in teams keeping score and being willing to admit error and change course Superforecasting offers the first demonstrably effective way to improve our ability to predict the future whether in business finance politics international affairs or daily life and is destined to become a modern classic

Handbook for Mortals Joanne Lynn, MD, Joan Harrold, MD, Janice Lynch Schuster, 2011-06-16 Handbook for Mortals is warmly addressed to all those who wish to approach the final years of life with greater awareness of what to expect and greater confidence about how to make the end of their lives a time of growth comfort and meaningful reflection

The Way From Dusty Death Peter Bartrip, 2001-11-30 This historical account covering the 1890s to 1969 includes the emergence of medical and then official concern about the three diseases related to asbestos asbestosis lung cancer and mesothelioma the legislative process during and after the 1930s and the

impact of the 1931 Asbestos Industry Regulations The availability of much previously unexamined material including copious government records combined with unimpeded access to the vast archive of documents kept by the leading British asbestos manufacturer Turner and Newall have enabled Dr Bartrip to provide a comprehensive examination of this important medico legal question and to give a unique insight into occupational health and its regulation in twentieth century Britain

Specialty Competencies in Group Psychology Sally Barlow, 2013-03-08 Human beings are born into groups educated in groups and belong to many groups yet routinely attribute individual motives to their actions when in fact group influenced behaviors are the more likely culprit The theory research and practice of group dynamics group psychology and group psychotherapy illuminate useful ways for us to learn group skills and to better understand how we are influenced by groups In Specialty Competencies in Group Psychology Sally Barlow provides a comprehensive overview of the foundational and functional competencies related to the field of group psychology Barlow describes the potential treatment benefits of group work and shows how the wide range of applicability makes this a relevant volume across diverse areas regardless of the population receiving treatment or the theoretic orientation of the therapist This volume distills the uniqueness and contributions of the specialty in a way that benefits not only psychologists who specialize in group psychotherapy but also clinicians who have previously taken a more traditionally individual approach to treatment Series in Specialty Competencies in Professional Psychology Series Editors Arthur M Nezu and Christine Maguth Nezu As the field of psychology continues to grow and new specialty areas emerge and achieve recognition it has become increasingly important to define the standards of professional specialty practice Developed and conceived in response to this need for practical guidelines this series presents methods strategies and techniques for conducting day to day practice in any given psychology specialty The topical volumes address best practices across the functional and foundational competencies that characterize the various psychology specialties including clinical psychology cognitive and behavioral psychology school psychology geropsychology forensic psychology clinical neuropsychology couples and family psychology and more Functional competencies include common practice activities like assessment and intervention while foundational competencies represent core knowledge areas such as ethical and legal issues cultural diversity and professional identification In addition to describing these competencies each volume provides a definition description and development timeline of a particular specialty including its essential and characteristic pattern of activities as well as its distinctive and unique features Written by recognized experts in their respective fields volumes are comprehensive up to date and accessible These volumes offer invaluable guidance to not only practicing mental health professionals but those training for specialty practice as well

Global Student Mobility in the Asia

Pacific Peter Kell, Gillian Vogl, 2010-02-19 Over 2.7m students study in a country other than their own. Most of those students come from the Asia Pacific region and undertake study in universities in the developed world. This trend is predicted to grow exponentially but features many dilemmas. In the post-9/11 global environment, international students experience hostility and harassment as well as ambivalence about their value to the academy. Some live an uncertain life of poverty and alienation. Many also struggle to come to terms with living and studying in a foreign land where there are concerns about international students eroding academic standards, having poor English language proficiency and being unable to integrate and contribute to their new communities. But some also seek to make new homes in their host countries. The contributions in this book explore the complex and diverse aspects of transnational education and propose some pragmatic approaches to these dilemmas. These contributions explore new ways of looking at the phenomena of international students, their social and cultural needs as well as the challenges for teaching and learning, research supervision and English language in the academy. The book presents case studies and documents initiatives that are positive responses to the dilemmas of global student mobility.

Clinical Pharmacology E-Book Peter N. Bennett, Morris J. Brown, 2007-12-04 This book is for students, doctors and indeed for all concerned with evidence based drug therapy. A knowledge of pharmacological and therapeutic principles is essential if drugs/medicines are to be used safely and effectively for increasingly informed and critical patients. Doctors who understand how drugs get into the body, how they produce their effects, what happens to them in the body and how evidence of their therapeutic effect is assessed will choose drugs more skilfully and use them more successfully than those who do not. The principles involved are neither so numerous nor so difficult to understand as to deter any prescriber, including those whose primary interests lie elsewhere than in pharmacology. All who use drugs cannot escape either the moral or the legal duty of care to prescribe in an informed and responsible way. Introductory first three sections cover general principle of clinical pharmacology; five subsequent sections cover drug treatment of disease organised by body system. Retains approachable style set by the original author Professor Laurence. Emphasis throughout is on evidence based and safe drug prescribing. New colour design. Increased use of graphics. Slightly shorter by removal of out of date material.
