

A Friend of the Rain Forest

Word Count: 246

Name _____

It's hard to coax most individuals into taking an interest in rain forests. First of all, they seem so distant from most people. Second, they appear dark and dangerous. They are filled with snakes and poisonous plants. Dreadful, oversized insects are encountered everywhere. However, Jeff Corwin is different from most people. He has been concerned about the rain forests since he was a child.

Rain forests produce much of the air you are breathing right now. Jeff learned this fact in grade school. Since then, he has had one major goal: to spread the word about the significance of rain forests. In particular, he is most interested in the many unique animals that live there.

Why are these animals important? Many of the animals there cannot live anywhere else. In fact, these forests are home to half of the animal groups in the world. The animals are necessary for the health of the forest, as each one plays a role in keeping the rain forest in bloom. If even one died out, it could have a drastic effect on the others. All the other plants and animals living with it could suffer.

Jeff wants to help people develop an understanding of this valuable information. He has started clubs for young people. The clubs teach ways to help protect the rain forests. Jeff believes education is the best way to preserve this precious resource. When people learn about rain forests, they will want to help save them.
