Diverse Contemporary Issues Facing Business Management Education

Khan, Mohammad Ayub,2014-09-30 In

today's society it is not only desirable but essential for a business to take on a global edge. The best way to ensure a successful future is to educate business students about global policies currently at play. *Diverse Contemporary Issues Facing Business Management Education* discusses the issues that are facing both large and small corporations and the students who are seeking employment there. Questioning not only what changes globalization has brought to the business world but what ways our education system will have to change to keep up, this book is an essential reference source for business owners, educators, students, or anyone interested in the future globalization of the business market. Why Cities Matter Stephen T. Um, Justin Buzzard, 2013-03-31 We live in a unique moment in history. Right now more people live in urban centers than ever before. This means that we have an unprecedented opportunity to influence the majority of the world through the church in the city. Helping us to make the most of this moment, urban pastors Justin Buzzard and Stephen Um lay out a compelling vision for cultural engagement and church planting in our world's cities. If you're looking for motivation to maintain a commitment to the city or for guidance as you consider going all in, this book provides a comprehensive analysis of urban life that informs, instructs, inspires, and answers questions including: Why cities are so important, What the Bible says about cities, How to overcome common issues and develop a plan for living missionally in the city. Instead of retreating from or taking from our cities, here is a call to make the cities our home, to take good care of them, and to participate in God's kingdom building work in the urban centers of our world. **Cases & Materials on International Law** Martin|McCorquodale Dixon (Robert|Williams, Sarah), 2024 **Geographies of Developing Areas** Glyn Williams, Paula Meth, Katie Willis, 2014-03-21 *Geographies of Developing Areas* is a thought-provoking and accessible introductory text presenting a fresh view of the Global South that challenges students' preconceptions and promotes lively debate. Rather than presenting the Global South as a set of problems from rapid urbanization to poverty, this book focuses on the diversity of life in the South and looks at the role the South plays in shaping and responding to current global change. The core contents of the book integrate traditional concerns of development geographers such as economic development and social inequality with aspects of the global South that are usually given less attention such as cultural identity and political conflict. This edition has been fully updated to reflect recent changes in the field and highlight issues of security risk and violence, environmental sustainability, and climate change and the impact of ICT on patterns of North-South and South-South exchange. It also challenges students to think about how space is important in both the directions and the outcomes of change in the Global South, emphasizing the inherently spatial nature of political, economic, and socio-cultural processes. Students are introduced to the Global South via contemporary debates in development and current research in cultural, economic, and political geographies of developing areas. The textbook considers how images of the so-called Third World are powerful but problematic. It explores the economic, political, and cultural processes shaping the South at the global scale and the impact that these have on people's lives and identities. Finally, the text considers the possibilities and limitations of different development strategies. The main arguments

of the book are richly illustrated through case study material drawn from across the Global South as well as full colour figures and photos. Students are supported throughout with clear examples, explanations of key terms, ideas and debates and introductions to the wider literature and relevant websites in the field. The pedagogical features of the book have been further developed through discussion questions and activities that provide focused tasks for students' research, including investigation based around the book's case studies and in-depth exploration of debates and concepts it introduces.

Social Change Jay Weinstein, 2010-06-16. This introduction to social change covers the momentous and relatively recent changes that have occurred in the human condition, examining not only the major causes and conditions underlying our current situation but also the main choices and options we face as we strive to shape our individual and collective futures. This edition of *Social Change* has been thoroughly updated and revised. Building on previous editions, the book introduces a social scientific approach to change, discusses the components of change and the factors driving them, examines change on the macro level, then looks toward the future with a discussion of planned change. Most chapters explore societies of yesterday, today and tomorrow and include comparative dimensions, especially along First, Second and Third World lines. The engaging narrative traces several themes, such as the rise of capitalism and the socialist alternative or civil rights movements in the United States and elsewhere throughout the book. *Social Change* Third Edition features a new discussion of the recent economic crisis and the interconnectedness of the global economy, new empirical data on globalization and updated discussions of the concepts of evolution and altruism. It also incorporates the dramatic changes in India and China throughout the book.

Cases & Materials on International Law Martin Dixon, Robert McCorquodale, Sarah Williams, 2016. The sixth edition of *Cases* placing international law directly in the context of contemporary debate. The book offers broad coverage of international law and is an appropriate match for a range of courses and teaching styles.
