Harperism Donald Gutstein, 2014-08-31 Margaret Thatcher transformed British political life forever So did Ronald Reagan in the United States Now Canada has experienced a similar dramatic shift to a new kind of politics which author Donald Gutstein terms Harperism Among its key tenets A weakened labour movement and preferably the disappearance of unions will contribute to Canada's economic prosperity Cutting back government scientific research and data collection will improve public policy making Eliminating First Nations reserves by converting them to private property will improve conditions of life for aboriginal peoples Inequality of incomes and wealth is a good thing and Canada needs more of it These and other essential elements of Harperism flow from neo liberal economic theories propounded by the Austrian economist Friedrich von Hayek and his U S disciples They inspired Thatcherism and Reaganism Stephen Harper has taken this neo liberalism much further in many key areas As Donald Gutstein shows Harper has successfully used a strategy of incremental change coupled with denial of the underlying neo liberal analysis that explains these hard to understand measures The success of Harperism is no accident Donald Gutstein documents the links between the politicians think tanks journalists academics and researchers who nurture and promote each other's neo liberal ideas They do so using funds provided by ultra rich U S donors by Canadian billionaires like Peter Munk and by many big corporations all of whom stand to gain from the ideas and policies the Harperites develop and push This book casts new light on the last ten years of Canadian politics It documents the challenges that Harperism with or without Stephen Harper will continue to offer to the many Canadians who do not share this pro market world view

The Case Against Theism Raphael Lataster, 2018-06-14 This monograph offers a critique of arguments for the existence of a specifically Christian God advanced by prominent scholar William Lane Craig The discussion incorporates philosophical mathematical scientific historical and sociological approaches The author does not seek to criticize religion in general or

Christianity specifically Rather he examines the modern and relatively sophisticated evidential case for Christian theism Scholars have been arguing for theism or naturalism for centuries and there seems little to add to the discussion especially from the theistic side However to assume that either theism or naturalism obtains is a false dichotomy There are alternatives to both that merit consideration Employing a probabilistic approach the author advances this discussion His work uniquely utilizes not only naturalistic hypotheses to argue against theism It also presents supernaturalistic hypotheses This leaves no question that theism is almost certainly false even if some form of divine reality exists This project seeks not to argue that Christianity or any other faith or religion is undesirable but only to critically examine evidentialist claims posited by Christianity's learned apologists In fact a major secondary aim is to consider alternative god conceptions such as polytheism and pantheism This work aims to highlight that Christian theism is often granted special privileges by theistic philosophers of religion which seems doubly inappropriate when certain alternative god conceptions may even prove to be more plausible
