Cambridge International General Certificate of Secondary Education

MARK SCHEME for the October/November 2014 series

0600/11

0600 AGRICULTURE

Paper 1, maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2014 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

An Improved Lightweight Privacy Preserving Authentication Scheme for SIP-Based-VoIP Using Smart Card Saeed Ullah Jan,2017-04 In the past few years secure information sharing became very popular in the area of immigration military applications healthcare education foreign affairs etc As secure communication utilizes both wireless and wired communication mechanizations for exchanging sensitive information security and privacy of the information exchange cannot be easily compromised To moderate the security integrity authenticity and privacy issues related to information exchange numerous authentication mechanisms have been recommended by different researchers in the literature in recent times but these are vulnerable to prospective security flaws such as masquerade insider replay impersonation password guessing server spoofing denial of service attacks and in addition have failed to deliver mutual authentication In the past few years we have also witnessed a balanced growth in the acceptance of VoIP Voice over IP facilities because the numerous Web and VoIP applications depend on huge and extremely distributed infrastructures to process requests from millions of users in an appropriate manner Due to their extraordinary desires these large scale internet applications have frequently surrendered security for other objectives such as performance scalability and availability As a result these applications have characteristically favored weaker but well organized security mechanisms in their foundations Session Initiation Protocol SIP is an application and presentation layers signaling protocol that initiates modifies and terminates IP based multimedia sessions Implementing SIP for secure communication has been a topic of study for the past decade and several proposals are available in the research domain However security aspects are not addressed in most of these proposals because SIP is exposed to several threats and faces security issues at these layers Probes for SIP Session Initiation Protocol servers have been conveyed for many years To gather more details about these activities the author has designed a scheme for SIP servers in a network and composed data about some popular attacks Furthermore he explains his interpretations and guidance on how to prevent these attacks from being successful Biometrics a new field of research has also been dealt with in this research by means of a three factor authentication scheme in which one factor is biometrics **Mathematical Modeling**

and Simulation of Systems Serhiy Shkarlet, Anatoliy Morozov, Alexander Palagin, Dmitri Vinnikov, Nikolai Stoianov, Mark Zhelezniak, Volodymyr Kazymyr, 2022-02-23 This book contains works on mathematical and simulation modeling of processes in various domains ecology and geographic information systems IT industry and project management The development of complex multicomponent systems requires an increase in accuracy efficiency and adequacy while reducing the cost of their creation The studies presented in the book are useful to specialists who involved in the development of real events models analog management and decision making models production models and software products Scientists can get acquainted with the latest research in various decisions proposed by leading scholars and identify promising directions for solving complex scientific and practical problems The chapters of this book contain the contributions presented on the 16th International Scientific practical Conference MODS June 28 July 01 2021 Chernihiv Ukraine **Proceedings of the Future Technologies Conference (FTC) 2018** Kohei Arai, Rahul Bhatia, Supriya Kapoor, 2018-10-17 The book presenting the proceedings of the 2018 Future Technologies Conference FTC 2018 is a remarkable collection of chapters covering a wide range of topics including but not limited to computing electronics artificial intelligence robotics security and communications and their real world applications The conference attracted a total of 503 submissions from pioneering researchers scientists industrial engineers and students from all over the world After a double blind peer review process 173 submissions including 6 poster papers have been selected to be included in these proceedings FTC 2018 successfully brought together technology geniuses in one venue to not only present breakthrough research in future technologies but to also promote practicality and applications and an intra and inter field exchange of ideas In the future computing technologies will play a very important role in the convergence of computing communication and all other computational sciences and applications And as a result it will also influence the future of science engineering industry business law politics culture and medicine Providing state of the art intelligent methods and techniques for solving real world problems as well as a vision of the future research this book is a valuable resource for all those interested in this area Optimization Models in Steganography Using Metaheuristics Dipti Kapoor Sarmah, Anand J. Kulkarni, Ajith Abraham, 2020-02-25 This book explores the use of a socio inspired optimization algorithm the Cohort Intelligence algorithm along with Cognitive Computing and a Multi Random Start Local Search optimization algorithm One of the most important types of media used for steganography is the JPEG image Considering four important aspects of steganography techniques picture quality high data hiding capacity secret text security and computational time the book provides extensive information on four novel image based steganography approaches that employ JPEG compression Academics scientists and engineers engaged in research development and application of steganography techniques optimization and data analytics will find the book s comprehensive coverage an invaluable resource *The International Conference on Health Informatics* Yuan-Ting Zhang, 2013-11-20 This volume presents the proceedings of the International Conference on Health Informatics ICHI The conference was a new special topic conference

initiative by the International Federation of Medical and Biological Engineering IFMBE held in Vilamoura Portugal on 7-9 November 2013. The main theme of the ICHI2013 was Integrating Information and Communication Technologies with Biomedicine for Global Health. The proceedings offer a unique forum to examine enabling technologies of sensors, devices and systems that optimize the acquisition, transmission, processing, storage, retrieval of biomedical and health information as well as to report novel clinical applications of health information systems and the deployment of mHealth, eHealth, uHealth, pHealth and Telemedicine.

The Bloomsbury Companion to Language Industry Studies Erik Angelone, Maureen Ehrensberger-Dow, Gary Massey, 2019-11-14. This volume provides a comprehensive overview of the key issues shaping the language industry, including translation, interpreting, machine translation, editing, terminology management, technology and accessibility. By exploring current and future research topics and methods, the Companion addresses language industry stakeholders: researchers, trainers and working professionals who are keen to know more about the dynamics of the language industry. Providing systematic coverage of a diverse range of translation and interpreting-related topics and featuring an A to Z of key terms, *The Bloomsbury Companion to Language Industry Studies* examines how industry trends and technological advancement can optimize best practices in multilingual communication, language industry workspaces and training.

Mathematical Methods for Curves and Surfaces Michael Floater, Tom Lyche, Marie-Laurence Mazure, Knut Mørken, Larry L. Schumaker, 2014-02-03. This volume constitutes the thoroughly refereed post-conference proceedings of the 8th International Conference on Mathematical Methods for Curves and Surfaces (MMCS 2012) held in Oslo, Norway, in June/July 2012. The 28 revised full papers presented were carefully reviewed and selected from 135 submissions. The topics range from mathematical analysis of various methods to practical implementation on modern graphics processing units. The papers reflect the newest developments in these fields and also point to the latest literature.
