The Universal Declaration of Human Rights and the Challenge of Religion Johannes Morsink, 2017-08-03 Repulsed by evil Nazi practices and desiring to create a better world after the devastation of World War II in 1948 the UN General Assembly adopted the Universal Declaration of Human Rights UDHR Because of the secular imprint of this text it has faced a series of challenges from the world s religions both when it was crafted and in subsequent political and legal struggles The book mixes philosophical legal and archival arguments to make the point that the language of human rights is a valid one to address the world s disputes It updates the rationale used by the early UN visionaries and makes it available to twenty first century believers and unbelievers alike The book shows how the debates that informed the adoption of this pivotal normative international text can be used by scholars to make broad and important policy points

Sociology for Music Teachers Richard Colwell, Hildegard Froehlich, 2015-07-02 For upper level undergraduate and introductory graduate and doctoral courses in music education Outlining the basic aspects constructs and concepts relevant to understanding music teaching and learning from a sociological perspective this volume introduces students to the discipline as a tool in understanding their own work The text shows how certain academics in music sociology and education have thought about the relationship of music to education schooling and society and examines the consequences of such thinking for making instructional choices in teaching methods and repertoire selection School music

teaching is imbedded in two major societal traditions 1 the tradition of music making listening and responding and 2 the tradition of education as a societal mandate The first tradition holds firmly to music artistry and musicological scholarship the latter of which includes music sociology The second tradition that of education as a field of study relies mostly on pedagogical principles rooted equally in psychology and sociology Hildegard Froehlich bases the book upon the premise that a music teacher s work is equally shaped by both traditions The more music teachers become aware of how societal structures shape their own lives as well as the lives of their students colleagues and superiors the more reality based their teaching will become Society is a composite of communities in which different social classes groups and reference groups co exist to varying degrees of compatibility due to real or perceived differences in norms and values as well as hierarchies of power Informed or intuitive choices made by an individual indicate allegiances to particular groups how those groups are structured hierarchically and where and how each individual fits into those hierarchies This is true for the music world as it is true for the world of education
